Motor Fuel Trends

Gasoline Sales

Based on reports of 29 States, gasoline consumption for January-June 1996 increased by 2.8 percent compared to the same period in 1995.[1] During this period, vehicle-miles of travel increased by 1.7 percent.

The gasoline volume shown in this report is a cumulative tabulation of gross volume reported by wholesale distributors to State motor fuel tax agencies. It includes highway use, nonhighway use and losses. There is a lag of up to 6 weeks between the wholesale transactions reported and retail sales to consumers. Travel trends are reported monthly in *Traffic Volume Trends* based on actual traffic counts at permanent traffic recorders operated by the State highway agencies and, thus, reflect only highway use of fuel. The vehicle-miles reported include all vehicles, regardless of fuel type. While data in both reports reflect changes in trends, large monthly changes can be caused by exceptional weather conditions, variations in timing of holidays, or processing delays.

Motor Fuel Taxation

All States levy volume taxes on gasoline and diesel fuel. The rates in effect for 1996 are shown in Table MF-121T. The gasoline rates vary from a low of 7.5 cents per gallon to 37 cents with an average of 19.54 cents. Five States provide for full or partial exemptions for gasohol, a blend of 90 percent gasoline and 10 percent fuel alcohol. Diesel fuel rates vary from 7.5 cents to 29 cents per gallon.

Traditionally, State fuel tax rates could only be changed with legislation, but 11 States now have variable rate motor fuel taxes. These taxes are adjusted at specified intervals—annually, semiannually, or quarterly—usually on the basis of an index or formula specified in the enabling legislation. These States are identified in the notes on Table MF-121T. Adjustments to variable rate taxes are announced by State tax agencies shortly before the effective date of the change. In addition to rate changes under variable rate tax laws, the following rate changes are anticipated through the end of 1997:

Connecticut	Effective 10/1/96, gasoline rate increases 1 cent. An increase of 1 cent is also scheduled for 1/1/97.
New York	Effective 6/1/97, the 2.5 percent surtax on the Petroleum Business Tax will be eliminated.

[1] This percentage change is a comparison for those States for which data are available for the report month. However, the percentage increase on the national map is a comparison of cumulative data for all States for which any 1996 data are available.

1/ This table shows gross volume of special fuels (primarily diesel fuel with small amounts of liquefied petroleum gas) reported by the State motor fuel tax agencies. To the extent possible, fuel consumed by Federal, State, and local government agencies and all nonhighway use has been excluded from this table. Further adjustments may be made during the year-end analysis. In many cases, the data reflect retail sales, but a number of States tax special fuels at the whole sale level. In come cases, corrections for interstate motor carrier use have not been made. When interstate motor carrier fuel volume is reported quarterly to FHWA, the volume is shown in the third month of the quarter. Highway use of special fuels is reported in table MF-21 in the annual report, Highway Statistics.

2/ Total includes only those States for which data are shown.

1/ This table shows gross volume of special fuels (primarily diesel fuel with small amounts of liquefied petroleum gas) reported by the State motor fuel tax agencies. To the extent possible, fuel consumed by Federal, State, and local government agencies and all nonhighway use has been excluded from this table. Further adjustments may be made during the year-end analysis. In many cases, the data reflect retail sales, but a number of States tax special fuels at the whole sale level. In come cases, corrections for interstate motor carrier use have not been made. When interstate motor carrier fuel volume is reported quarterly to FHWA, the volume is shown in the third month of the quarter. Highway use of special fuels is reported in table MF-21 in the annual report, Highway Statistics.

2/ Total includes only those States for which data are shown.

3/ Federal Highway Administration estimate.
