INTRODUCTION

This publication presents tabular information on State and Federal laws that provide for the taxation of motor fuels, motor vehicles, motor carriers, and licensed drivers, and the distribution of these taxes and fees. Also included are tables that show the use of other State taxes for highways and the involvement of Federal agencies and Federal funds in highway activities. The information presented is based on data obtained from State authorities and the laws of the various States.

Motor Fuels

Data on motor fuels, including the State gallonage tax rates on gasoline, diesel, liquefied petroleum gas, and gasohol, and sales taxes on motor fuels are summarized in Table MF-121T. Tables MF-101 through MF-105 provide data on State laws for administering gasoline and special-fuel taxes.

The current version of Table MF-104 reflects the fundamental shift in the taxation of Interstate motor carriers caused by the International Fuel Tax Agreement (IFTA). As of September 30, 1996, all States and Canadian Provinces have become participating members in IFTA. IFTA replaced individual State motor-fuel tax provisions on Interstate motor carriers with a uniform method of reconciling motor-carrier taxation among member jurisdictions.

The uniform method simplified motor-fuel tax reporting by allowing a motor carrier to report and pay motor-fuel taxes owed to the States and Canadian Provinces to a single base jurisdiction, typically their home State or Province. Under IFTA an Interstate motor carrier only needs a single IFTA fuel tax license for each of its qualified motor vehicles.

IFTA defines a qualified motor vehicle as a motor vehicle, other than a recreational vehicle, that is used, designed or maintained for the transportation of persons or property that: has two axles and a gross vehicle weight or registered gross vehicle weight exceeding 26,000 pounds; or has three or more axles regardless of weight; or is used in combination, and the gross vehicle weight of the combination is more than 26,000 pounds.

For these qualified motor vehicles, the formula most used for the calculation of IFTA-taxed gallonage is: 1) total mileage is divided by total fuel usage to determine fleet miles per gallon, and 2) total mileage within each jurisdiction is then divided by fleet miles per gallon to determine taxable gallons for each jurisdiction.

Taxable gallons are multiplied by the member tax rates to determine the amount of the tax liability. The amount of the tax is paid to the base jurisdiction. IFTA defines the base jurisdiction as the jurisdiction where: the motor carrier is registered, the operational control and operational records of the qualified motor vehicles are maintained, and some travel actually occurs by qualified motor vehicles of a motor carrier's company fleet.

The base State or Province uses a clearinghouse arrangement to forward the portion of motor-fuel taxes owed to other member States and Provinces. IFTA taxable gallonage may be calculated in

more than one way. Several States have legislated a variation of the formula with the results about the same as the above formula. Payments for qualified motor vehicles are made quarterly in all jurisdictions. The quarterly report and payment are due on the last day of the month immediately following the close of the quarter for which the report and payment are being filed. A few States have legislation which exempts small operators from quarterly payments but requires annual filing and payment.

Tables MF-107 through MF-109 summarize the State licenses and fees imposed on wholesalers, retailers, and users of motor fuel. Table MF-110 gives the fee schedule for the inspection of liquid fuels. Table MF-106 details the legal provisions governing the disposition of State motor-fuel tax receipts. In States that deposit revenues in a common fund, the distribution and use of these revenues are reported in Table MF-106.

Motor Vehicles

Table MV-103 summarizes data on motor vehicles and includes the fee schedule for registering automobiles, single-unit trucks, tractor-trucks, semitrailers, twin semitrailer combinations, and the typical fee for each class of vehicle, including 3-axle and 5-axle combinations and the twin semitrailer combinations. Table MV-106 gives the provisions governing the disposition of State motor-vehicle, motor-carrier, and driver-license revenues. A separate publication, *Driver License Administration Requirements and Fees*, provides more detail on driver licensing.

Other State

An additional table is included to show other State funding for highways. Table S-106 shows the allocation of State taxes and fees, not considered to be highway-user revenue, for highways. Highway-user revenue are taxes and fees levied on the owners and operators of motor vehicles for their use of the public highways, which are included in the MF and MV table series. Not all taxes paid by highway users are considered to be highway-user revenue.

The distinction between highway-user taxes and other State taxes that are dedicated for highways is sometimes difficult to determine. Sales and use taxes, gross receipts taxes and ad valorem property taxes are not considered highway-user imposts when they are part of general tax structures and are applied to a variety of commodities not related to highways. If a tax is applied to a broad spectrum of commodities (even if a given portion is dedicated to highways), FHWA considers it to be a nonuser tax and is included in Table S-106.

Federal

Two tables on Federal funding for highways are included. Table FE-21B summarizes Federal motor-fuel and motor-vehicle taxes. Table F-106 lists the provisions governing the allocation of Federal funds for highway purposes. The data for Table F-106 are primarily obtained from the Federal budget.

1/ As used in this table, special fuels are motor fuels other than gasoline and gasohol, and include diesel fuel and liquefied petroleum gases (LPG).

2/ Rates shown are as of January 1, 1998. Some of the rates shown are composites of several taxes. Where two tax rates are shown for a State, the first rate applies to diesel fuel and the second to liquefied petroleum gases (LPG), such as propane and butane. Many States provide for an annual fee in lieu of paying the gallonage tax on LPG. See Table MF-121T for more detail on the composition of the rates and special permit programs for LPG. See Table MF-106 for State code citations for the taxes.

3/ Date tax is due in month following month of transfer of special fuel.

4/ Special provisions for taxation of motor fuel used in interstate operation are shown in Table MF-104.

5/ The Commissioner of Agriculture and Industries administers and collects the 2-cent inspection fee included in the tax. The liquefied petroleum gas (LPG) board administers the tax on LPG.

6/ LPG tax is paid by the retailer or user and the tax is due on the 25th day of the month.

7/ Tax is due in April, July, October and January of the following year in Idaho, Maine, Montana, Nevada, and New Hampshire (applies to users only in Maine, Montana, Nevada and New Hampshire). In Virginia, is due by the 5th day of the second month of receipt or sale.

1/For purposes of brevity, refunded and exempt have been abbreviated as 'Ref' and 'Ex', respectively. For those that are granted partial exemptions, the portions of those refunded or exempt is shown in parentheses. In addition to the classes of refunds or exemptions listed, all States grant exemptions or refunds to distributors on export sales, purchases of tax-paid fuel, previous overpayment, etc., to avoid duplication of payment. See Table MF-102 for provisions concerning special fuels. Table MF-103 shows the procedures regarding allowances for losses in storage and handling, losses by destruction and expense of collection. See Table MF-104 for provisions concerning interstate motor carrier fuel use.

2/See Table MF-121T for more detail on gasoline and gasohol tax rates and sales tax information.

3/Only the aviation gasoline tax rates that differ from the prevailing tax rates in column (1) are shown in this column.

4/Use in motor vehicles on public highways is taxed in all States.

5/In most States which exempt motor fuel purchased by the Federal Government, there is also a provision for refund of the tax if tax-paid fuel is purchased.

6/Includes Federal nonhighway and military use.

7/Unless noted otherwise, the exact time periods specified by statute or regulation are given in months (i.e. 30 days = 1 month, 45 days = 1.5 months, 1 year = 12 months, by March 31 for preceding calendar year = 3 months after calendar year, etc.). The time limits allowed for uses not listed on this table (see footnote 1) may differ from those shown in this column.

8/Special provisions for specific nonhighway uses: in Alaska, marine use of gasoline and special fuel is taxed at 5 cents per gallon, others partially refunded as follows: 9.8 cents of the 12.8 cent tax for commercial fishing use in Florida; refund of 90 percent of tax on use in motor boats in Kentucky; full refund of the 20 cents tax for gasoline used in commercial fishing boats only in Louisiana; 19 cents of the 20 cent tax is refunded for industrial use in North Dakota.

9/In Arizona and Montana, Federal military highway use is taxed, while nonhighway use is refunded. In Arkansas, sales to official U.S. Government agencies for use in official U.S. Government vehicles is exempt.

In California, Louisiana, and Washington, quantities sold to the armed forces for use in aircraft or ships or for use outside of the State are exempt. In Nevada, sales for use in vehicles of the armed forces are exempt.

10/Closed portions of roads under repair are not public highways.

11/Variable tax rate shown as of January 1, 1998.

12/Rate consists of a fixed rate of 4 cents per gallon plus a base rate of 6.9 cents per gallon of motor fuel which is indexed to the CPI-U and currently yields a 9.0 cents per gallon rate.

There is an additional State imposed State Comprehensive Enhanced Transportation System (SCETS) Tax that varies by county from 0 to 4.8 cents per gallon which is not included in rate shown.

13/Gasoline is tax exempt if purchased in bulk lots of over 300 gallons in Wyoming; 500 gallons or more in Florida (from a terminal supplier or wholesaler) and West Virginia; and 6,000 gallons or more in Louisiana.

14/It is exempt if contractor holds a cost-plus-fixed-fee contract with the U.S. Government.

15/Aviation gasoline sales in these States are generally exempt when purchased in large quantities or at specified airports.

16/Aviation refunds are on a sliding scale ranging from 15 cents per gallon on the first 50,000 gallons to 19.5 cents per gallon over 200,000 gallons in Minnesota. Counties or municipalities refund 2 cents per gallon to consumers on fuel used at their publicly owned airports in excess of 10,000 gallons per month in Wyoming.

17/No refunds are paid on fuel used in highway construction or maintenance.

18/Three months after fiscal year for agriculture, volunteer fire, ambulance, etc.; 3 months after calendar year for political subdivisions.

19/The 4.85 cents per gallon consumer sales and service tax is not refundable and aviation use is not exempt.

Ninth-Cent Fuel Tax Trust Fund.....	1 cent (diesel/LPG/CNG). [optional 1 cent tax on gasoline/gasohol].	Establishing, operating and maintaining a transportation system and financing the acquisition, construction, reconstruction, and maintenance of roads and streets. Can be used as local share of State or Federal projects.	The 4 cent fixed component of the motor fuel tax is composed of a 2 cents "Constitutional Fuel Tax", a 1 cent county fuel tax and a 1 cent municipal fuel tax. The variable component "fuel sales tax" of the State motor-fuel tax (9 cents) is determined by annually adjusting the base rate of 6.9 cents by the change in the Consumer Price Index (CPI). The minimum amount of the variable tax is 6.9 cents per gallon. The variable component "fuel sales tax" does not apply to "alternative fuels", i.e., LPG and CNG. The diesel and "alternative fuels" rates include mandatory local option taxes of 1 cent (the "ninth-cent tax") and 6 cents. On gasoline and gasohol, counties may also impose the 1 cent ("ninth-cent tax") and a "local option fuel tax" between 1 cent and 11 cents. Diesel and LPG rates shown also include an additional variable tax, the "State Comprehensive Enhanced Transportation system (SCETS) Tax". The SCETS rate was initially computed as two-thirds of the lesser of six cents or the "local option fuel tax" rate imposed by the county (including the "Ninth-Cent Tax"), and subsequently adjusted for annual changes in the CPI. (For 1998: diesel/LPG/CNG rate is 5.0 cents and the gasoline/gasohol rate ranges from 0 to 5.0 cents).	336.021
Local Option Fuel Tax Trust Fund.....	6 cents (diesel/LPG/CNG). [optional 1 to 11 cents tax on gasoline/gasohol].	For use by county and municipal governments for transportation purposes.	"Local option fuel tax" on gasoline and gasohol. Diesel/LPG/CNG portion is mandatory. Tax is administered by the Department of Revenue. If all transportation needs are met, counties with a population of 50,000 less on April 1, 1992 may use proceeds of "original" 1 to 6 cents of tax for other capital infrastructure needs.	336.025

1/ This summary is based on the fee schedules in effect January 1, 1998 and covers vehicles in private operation. Property taxes and taxes levied only at the time of first registration have been excluded.

2/ This summary includes provisions of laws enacted through December 1996, or the most current information available.

3/ To illustrate the practical fee range on a basis that is comparable for all States, the fee for a very light 1985 2-door sedan is given as the minimum and the fee for a heavy 1995 4-door sedan is given as the maximum.

There is no intention to show the absolute minimum and maximum fees for each State. In many States, special plates at extra cost are available to those desiring personalized plates for amateur radio operators, for disabled veterans, for members of veterans organizations, etc.

4/ A 1988 4-door sedan of 2,887 pounds empty weight was selected as the " typical " passenger car.

5/ The fee schedules of some States apply to combinations as well as to single-unit trucks. The maximum fee given in this table for those States is therefore much greater than in others. In general, 2-axle single-unit trucks are seldom licensed for more than 26,000 pounds gross weight (or its equivalent under a State's registration system).

6/ The reduced rates also apply to natural resources vehicles.

7/ A 1996 stake body truck of 6,800 pounds empty weight and 20,050 pounds gross weight was taken as the " typical " single-unit truck.

8/ A 1996 diesel-powered 4-axle dump truck of 24,000 pounds empty weight and 58,000 pounds gross weight was taken as a " typical " heavy single-unit truck.

9/ Included in the registration fees shown are beautification fees of \$1.00 for the City and County of Honolulu and for the counties of Hawaii and Maui, and 50 cents for the County of Kauai and an emblem fee of 50 cents for all counties. Not included are license plate fees of \$ 5.00 for the City and County of Honolulu and the County of Kauai and \$ 3.50 for the counties of Hawaii and Maui.

10/ Registration fees for the City and County of Honolulu.

11/ Registration fees for the counties of Hawaii, Maui, and Kauai, respectively.

12/ In addition to the fees shown, trucks and tractor trucks with gross weights over 26,000 pounds are assessed a " use fee " of 7.97 mills per mile for 26,001 pounds to 31.68 mills per mile for 78,001 pounds and over.

13/ Trucks and combinations over 26,000 pounds, except farm vehicles, are required to pay a mileage tax. Trailer fees apply only if not registered as part of a combination.

14/ Motor vehicles used exclusively on the farm or on highways connecting farms are exempt from registration. A biennial certificate of exemption is required of such vehicles for a fee between \$24.00 and \$100.00.

15/ The fees for panel or pickup trucks: \$ 25.00 for 4,000 pounds or less gross weight to \$ 30.00 for 4,001 to 6,500 pounds gross weight plus \$ 1.50 State Police Inspection fee. Vehicles may be registered quarterly at one-fourth the yearly fee plus \$ 5.00 for each quarter the vehicle is registered or licensed.

16/ Commercial vehicles are registered at \$ 35.00 for 4,000 pounds or less to \$ 2,225.00 for 80,000 pounds gross vehicle weight. Up to 117,000 pounds gross vehicle weight allowed on non-interstate highways. The fee for a commercial vehicle of 117,000 pounds gross vehicle weight is \$3,650.

17/ In some States full trailers are taxed on the same basis as semitrailers, but in many, separate schedules are used. The separate schedules for full trailers are not included in this table.

18/ A 1996 diesel-powered truck tractor of 9,776 pounds empty weight and a semitrailer of 7,000 pounds empty weight, registered for 45,000 pounds gross combination weight, in private operation, were selected as the "typical" vehicles.

19/ A 1996 diesel-powered truck tractor of 13,074 pounds empty weight and a semitrailer of 12,300 pounds empty weight, registered for 80,000 pounds gross combination weight, in private operation, were selected as the "typical" vehicles.

20/ A " Rocky Mountain " double consisting of a 1992 diesel-powered truck tractor of 13,074 pounds empty weight, a 45-foot semitrailer of 12,300 pounds empty weight, and a 28-foot semitrailer and dolly of 8,800 pounds empty weight registered for 105,000 pounds gross combination weight, in private operation, were selected as the "typical" vehicles.

21/ Where the truck tractor and semitrailer are registered as a unit, the fee for the combination is given in the " tractor-truck " column.

22/ In addition to registration fees, there is levied a mileage tax based on operation and weight of vehicle for trucks over 60,000 pounds.

1/ Source: Office of Highway Information Management, Federal Highway Administration.

2/ Special fuels include benzol, benzene, naphtha, liquefied petroleum gas, casing head and natural gasoline, or other liquid used fuel in a motor vehicle except diesel, kerosene, gas oil, fuel oil, or a product taxable under the gasoline tax provisions. Prior to October 1, 1997, most special fuels were taxed at a single rate. Exceptions were LPG, which was not subject to the LUST tax, and neat alcohols, which are taxed at various rates depending on type and source of alcohol. Beginning October 1, 1997, LPG and LNG are taxed based on their energy content relative to gasoline. Other special fuels, with the exception of neat alcohols, are taxed at the basic special fuels rate.

3/ Neat alcohol made with alcohol derived from petroleum products is taxed as a special fuel.

4/ In 1996, only \$166,000 was collected by Internal Revenue Service for taxes on neat alcohol and some other miscellaneous sources. Furthermore, there is no accurate way to distribute these miscellaneous taxes to specific funds or accounts.

5/ Compressed natural gas is taxed 48.54 cents per thousand cubic feet (MCF), with the Mass Transit Account receiving 32.17 cents per MCF and the Highway Account receiving 16.37 cents per MCF. Roughly converting these amounts to cents per gallon results in the entries in the table above.

6/ Section 1920 of the Energy Policy Act of 1992 expanded the definition of gasohol effective January 1, 1993. Prior to the Act, gasohol was defined as a blend of gasoline and at least 10 percent fuel alcohol (by volume), and blends containing less than 10 percent alcohol were taxed as gasoline. Under the Act, the product now called 10 percent gasohol corresponds to the old definition. Two additional types of gasohol are also defined. The term 7.7 percent gasohol includes gasoline-alcohol blends where the alcohol content is at least 7.7 percent but less than 10 percent. The term 5.7 percent gasohol includes gasoline-alcohol blends where the alcohol content is at least 5.7 percent but less than 7.7 percent.

7/ Section 1401 of the Taxpayer Relief Act of 1997 replaced a mechanism by which the fair market value of tires exceeding 40 pounds was deducted from the fair market value of a truck and replaced it with a credit for the excise tax paid. This provision is effective January 1, 1998.

Federal Highway Trust Fund, Highway Account:			
National Highway System (NHS) Program	\$3,247,000,000	To reimburse the States and the District of Columbia for the Federal share of right-of-way, engineering, and construction on NHS projects in rural and urban areas. Funds may be used to pay up to 90 percent of the cost of improvements, except in the public lands States where a greater Federal participation is allowed, but not to exceed 95 percent. (23 U.S.C. 103).	The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) established the NHS. The system was officially designated by law on November 13, 1995. The NHS consists of 158,503 miles of Interstate, other rural principal arterials, urban freeways and expressways, and facilities on the Department of Defense Strategic Highway Network that are open to the public. Another 3,858 miles are not open to the public. The Federal share of NHS projects is 80 percent or 90 percent if used on the Interstate system.
Surface Transportation Program (STP)	\$7,678,000,000	This program includes: construction, reconstruction, rehabilitation, resurfacing, restoration, and operational improvements for highways and bridges; capital costs for transit projects; highway and transit safety improvements; and transportation enhancements (23 U.S.C. 133).	Each State must set aside 10 percent of STP funds for safety construction and 10 percent for transportation enhancements. 50 percent of the STP funds must be distributed based on population. The remaining 30 percent can be used in any area of the State. The Federal share of STP projects is 80 percent or 90 percent if used on the Interstate system.
Bridge Replacement and Rehabilitation Program	\$1,973,000,000	To enable the States to replace bridges over waterways or other topographical barriers when the States find that the bridge is significantly important and is unsafe because of structural deficiencies, physical deterioration, or functional obsolescence. (23 U.S.C. 144)	Apportioned based on the ratio of the estimated cost of deficient bridges in each State to the estimated total cost of deficient bridges for all States. Not less than 15 percent or more than 35 percent of the amount appropriated to each State shall be expended for projects located on public roads other than those on Federal-aid highways (23 U.S.C. 144) The Federal share of bridge projects is 80 percent.
Interstate Maintenance Program	\$2,488,000,000	This program replaces the Interstate 4R program and finances projects to rehabilitate, restore and resurface Interstate highways without adding to the capacity of the highway (23 U.S.C. 119).	55 percent of funds are apportioned based on the ratio of Interstate System lane miles in each State to total Interstate System lane miles, and 45 percent are apportioned based on the ratio of vehicle miles traveled (VMT) on the Interstate System in each State to total VMT on the Interstate System in all States. The Federal share of Interstate Maintenance is 90 percent of the cost of such projects. No state shall receive less than one-half percent of each year's apportionment.
Interstate Substitute Highway Program	\$4,000,000	For highway construction projects or public mass transit projects substituted for Interstate System routes withdrawn under provisions of 23 U.S.C. 103e-4. Projects must serve the area or areas from which the Interstate route or portion thereof was drawn.	Funds are distributed 25 percent on a discretionary basis and 75 percent on the basis of a cost estimate approved by Congress that estimates the cost of completing substitute highway projects. The federal share of Interstate substitute highway projects is 85 percent (23 U.S.C. 103e-4).
Congestion Mitigation and Air Quality Improvement Program (CMAQ)	\$807,000,000	This program funds projects to improve air quality in nonattainment areas for ozone and carbon monoxide. A wide range of transportation activities are eligible if FHWA and EPA determine they will help meet National ambient air quality standards. (23 U.S.C. 149)	The Federal share of CMAQ projects is 80 percent or 90 percent if used on the Interstate system.
Minimum Allocation	\$550,000,000	May be used for Interstate construction, Interstate maintenance, Interstate substitution, NHS, STP, bridge program, Scenic byways, and certain safety programs (23 U.S.C. 157a and 157b).	Funds are allocated to insure that a State's percentage of total apportionments in each fiscal year and most allocated funds from the prior year is not less than 90 percent of the percent of estimated Highway Trust Fund tax payments attributable to highway users in that State in the latest fiscal year for which data is available.
Intelligent Transportation Systems Program (ITS)	\$113,000,000	This program funds the development and application of advanced vehicle and highway technologies that provide improved: safety, mobility, driver convenience, energy efficiency and environmental quality.	Program includes the promotion of compatible standards and protocols, and the establishment of evaluation guidelines for operational testing. The Federal share of IVHS projects is 80 percent or 100 percent for innovative high-risk projects.
Emergency Relief Program	\$694,000,000	This program funds the repair and reconstruction of Federal-aid highways and Federally-owned roads damaged as a result of natural disasters or catastrophic failures (23 U.S.C. 125).	Includes an initial obligation of \$114,000,000 and Emergency Supplements of \$580,000,000 that also were obligated in FY 1997.
Federal Lands Highway Program	\$338,000,000	This program consists of three categories: public lands highways, parkways and park roads, and Indian reservation roads. Funds are allocated on the basis of relative need. (23 U.S.C. 204)	The Federal share for Federal Lands highway projects is 100 percent. See authorizations under the Department of the Interior.
