IV. CHART CORRECTIONS

Corrective action affecting charts is contained in this section. Chart corrections are listed numerically by chart number. The correction listed pertains to that chart only. It is up to the mariner to decide what charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition	Edition date	Last Local Notice to Mariners	Current Local Notice to Mariners	Datum
18555 (GS-95)	1 st Ed.	1/16/56	Last LNM 1/69	03/95	NAD 83
ID - FRANKLIN LAKE - LEE HARBOR - PARKER WATERWAY - (CGD13)					
Add Parker Channel Light "2", FI R 4sec 45FT 8M					
116°20'30"W					48°24'57"N
Position	Corrective action		Object of corrective action		

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. (Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles.
