^aEstimates as of July 1. Includes Armed Forces stationed in the United States.

^bData are not comparable to earlier years due to changes in definitions and methodology. See original source for more details.

Transportation (18.6%) is second only to housing (30.6%) as the largest expenditure for the average household. In 1996, approximately 17% of transportation expenditures were for purchasing gasoline and motor oil. There is an average of two vehicles per household.

Table 11.2
Average Annual Expenditures of Households by Income, 1997^a

“Residential Transportation Energy Consumption Survey.

Household vehicle ownership shows a dramatic increase from 1960 to 1990. In 1960, nearly 79% of households owned less than two vehicles; by 1990, it declined to 45%. Census data prior to 1990 indicated that the majority of households owned one vehicle; in 1990 that changed to two vehicles.

Table 11.4
Household Vehicle Ownership, 1960-90 Census
(percentage)

	No vehicles	One vehicle	Two vehicles	Three or more vehicles	Total vehicles**
1960	21.53%	56.94%	19.00%	2.53%	54,766,718
1970	17.47%	47.71%	29.32%	5.51%	79,002,052
1980	12.92%	35.53%	34.02%	17.52%	129,747,911
1990	11.53%	33.74%	37.35%	17.33%	152,380,479

*Compiled by the Census Bureau, these data on the total number of vehicles do not match the figures on Table 4.1. The figures on Table 4.1, from R.L. Polk and Company, are the preferred data.

1995 Nationwide Personal Travel Survey

The 1995 Nationwide Personal Travel Survey (NPTS) is a national survey designed to collect data on the nature and characteristics of personal travel. The definition of a trip in the NPTS is “any one-way travel from one address to another by private motor vehicle, public transportation, bicycle, or walking.” Excluded from the survey are jogging and walking for exercise, as is all bicycling and walking for individuals under 5 years of age. The survey collects detailed data on household trips, their purposes and the transportation modes used. The NPTS is sponsored by several agencies of the U.S. Department of Transportation and is conducted approximately every seven years. Since each of the surveys differ somewhat in terminology, survey procedure, and target population, one should be cautious when comparing statistics from one survey to the next. Improved methodologies used in the collection of the trip information in the 1995 NPTS make it impossible to compare these data with past NPTS survey data. Thus, the 1990 NPTS trip data have been adjusted to make it comparable with the latest survey. Both the original 1990 data and the adjusted 1990 data are shown in tables comparing trip information. The 1995 trip data should only be compared to the adjusted 1990 trip data, and the original trip 1990 data should be compared with previous surveys. Additional analyses can be done on the 1995 NPTS data through the Internet site: <http://www-cta.ornl.gov/npts>.

Table 11.5
Demographic Statistics
1969, 1977, 1983, 1990, and 1995 NPTS

	1969	1977	1983	1990	1995	Percent change 1969-95
Person per household	3.16	2.83	2.69	2.56	2.63	-17%
Vehicle per household	1.16	1.59	1.68	1.77	1.78	53%
Worker per household	1.21	1.23	1.21	1.27	1.33	10%
Vehicle per worker	0.96	1.29	1.39	1.40	1.34	40%
Average vehicle trip length (miles)	8.89	8.34	7.90	8.98	9.06	2%

Source:

U.S. Department of Transportation, Federal Highway Administration, *1990 Nationwide Personal Transportation Survey: Summary of Travel Trends*, FHWA-PL-92-027, Washington, DC, March 1992, Table 2. Data for 1995 were generated from the Internet site <http://www-cta.ornl.gov/npts>.
(Additional resources: <http://www.fhwa.dot.gov>)

Note:

Average vehicle trip length for 1990 and 1995 is calculated using only those records with trip mileage information present. The 1969 survey does not include pickups and other light trucks as household vehicles.

The 1995 NPTS data should be compared only to the 1990 adjusted data due to survey methodology improvements in collecting trip information. The original 1990 data are comparable to all previous surveys; however, comparisons should always be made with caution because of differing survey methodologies.

Table 11.6
Average Annual Vehicle-Miles, Vehicle Trips and
Trip Length per Household
1969, 1977, 1983, 1990, and 1995 NPTS

U.S. Department of Transportation, Federal Highway Administration, Nationwide Personal Transportation Study, Public Use Tapes, Washington, DC. Data for 1995 were generated from the Internet site <http://www-cta.ornl.gov/npts>. 1990 adjusted data - Oak Ridge National Laboratory, Oak Ridge, TN, August 1998. (Additional resources: <http://www.fhwa.dot.gov>, <http://www-cta.ornl.gov/npts>)

Note:

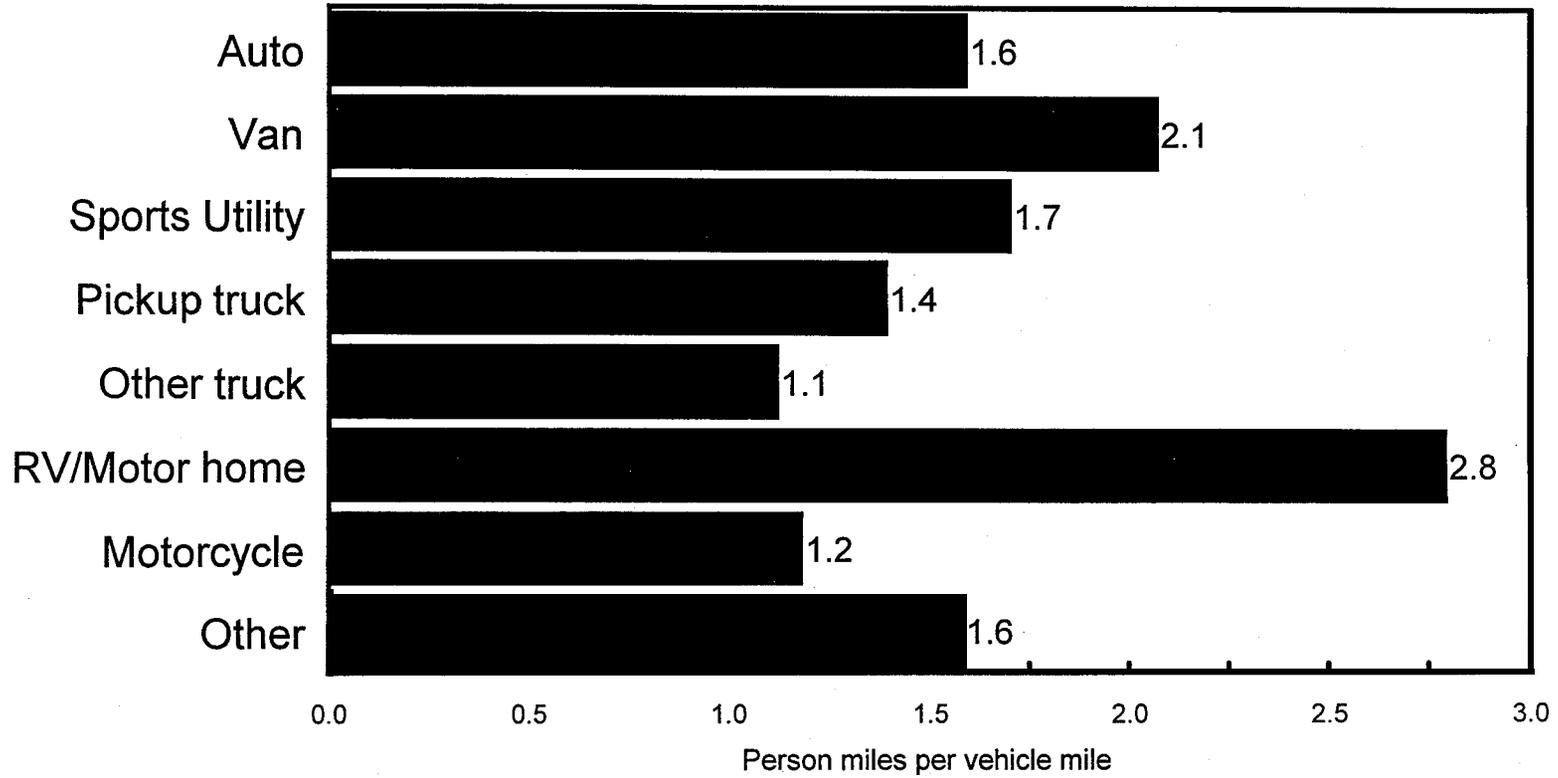

Average person trip length for 1990 and 1995 is calculated using only those records with trip mileage information present. "All purposes" includes unreported trip purposes.

^aIt is believed that the methodology changes in the 1995 NPTS did not affect journey-to-work trips; therefore, no adjustment is necessary.

^bIncludes trip purposes not shown on this table.

Figure 11.1. Average Vehicle Occupancy by Vehicle Type, 1995 NPTS

Source:

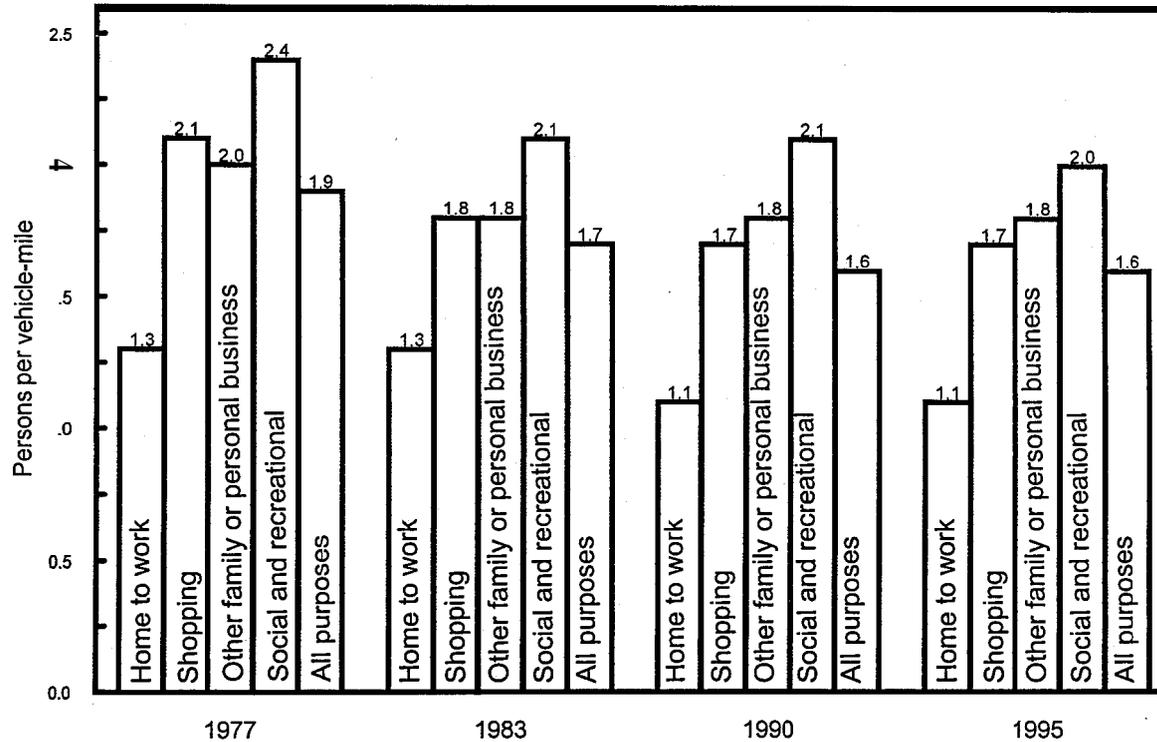

U.S. Department of Transportation, Federal Highway Administration, Nationwide Personal Transportation Survey, Washington, DC, 1997.
 (Additional resources: <http://www.fhwa.dot.gov>, <http://www-cta.ornl.gov/npts>)

The average vehicle occupancy, calculated as person-miles per vehicle-mile, was nearly identical in 1990 and 1995 for every trip purpose. The highest vehicle occupancy levels were in 1977. The increased number of vehicles per household and the decrease in average household size could have contributed to the decline since then.

Figure 11.2. Average Vehicle Occupancy by Trip Purpose 1977, 1983, 1990, and 1995 NPTS

Source:

U.S. Department of Transportation, Federal Highway Administration, 1990 Nationwide Personal Transportation Survey: Summary of Travel Trends, FHWA-PL-92027, Washington, DC, March 1992, Figure 6. Data from 1995 were generated from the public use file.

(Additional resources: <http://www.fhwa.dot.gov>, <http://www.cta.ornl.gov/npts>)

Less than 27% of all household vehicle-miles are trips to or from work. Errands such as family and personal business and shopping (combined) make up a third of vehicle travel. One quarter of all trips 75 miles or longer (one way) were for the purpose of visiting friends or relatives.

Table 11.8
Vehicle-Miles by Trip Purpose, 1995 NPTS

Purpose of trip	Daily trip vehicle-miles		Long trip vehicle-miles ^a		Total trip vehicle-miles	
	(millions)	(percent)	(millions)	(percent)	(millions)	(percent)

^aDefined as a trip which is 75 miles or longer one way.

As households owned more vehicles, the average annual miles for the most frequently driven vehicle increased. For example, the mostfrequently driven vehicle in five-vehicle households was driven 26% more per year than the one in two-vehicle households (21,177 miles vs. 16,804 miles).

Table 11.9
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS

Vehicle ^a	One-vehicle household	Two-vehicle household	Three-vehicle household	Four-vehicle household	Five-vehicle household
#1	12,379	16,804	18,853	20,724	21,177
#2		8,322	9,806	11,311	12,880
#3			4,555	6,395	7,319
#4				3,218	4,177.

^aVehicles are ranked by descending annual miles driven.

Historically, the data from the Nationwide Personal Transportation Study (NPTS) are based on estimates reported by survey respondents. For the 1995 survey, odometer data was also collected. The Residential Transportation Energy Consumption Survey (RTECS) data has always been collected from odometer readings. These data indicate that respondents may overestimate the number of miles driven in a year.

Table 11.11
Average Annual Miles Per Household Vehicle by Vehicle Age

Vehicle age (years)	National Personal Transportation Study				Residential Transportation Energy Consumption Survey				
	1983 self-reported	1990 self-reported	1995 self-reported	1995 odometer	1983 odometer	1985 odometer	1988 odometer	1991 odometer	1994 odometer

Note:

Data include all household vehicles. Data have been rounded to the nearest hundred.

In 1995 the average journey-to-work speed was faster (miles per hour increased to 34.6), but the travel time still increased, due to an increase in the average travel distance. Journeys-to-work using public transportation continued to take twice as long as private transportation, though there is only a slight difference in travel distance.

Table 11.12
Journey-to-Work Statistics
1983, 1990, and 1995 NPTS

Year	Private transportation	Public transportation	Other	Total
<i>Average travel time (minutes)^b</i>				
1983	17.6	39.8	10.6	18.2
1990	19.1	41.1	12.4	19.6
1995	20.1	42.0	18.8	20.7
<i>Average trip length (miles)</i>				
1983	8.9	11.8	1.4	8.5
1990	11.0	12.8	2.2	10.7
1995	11.8	12.9	8.2	11.6
<i>Average speed (miles per hour)</i>				
1983	30.2	17.8	7.6	28.2
1990 ^c	34.7	18.2	7.6	33.3
1995 ^c	35.4	19.3	25.9	34.6

Source:

U.S. Department of Transportation, Federal Highway Administration, Nationwide Personal Transportation Study, Public Use Tapes, Washington, DC. Data for 1995 were generated from the Internet site <http://www-cta.ornl.gov/npts>. (Additional resources: <http://www.fhwa.dot.gov>, <http://www-cta.ornl.gov/npts>)

^aIt is believed that the methodology changes in the 1995 NPTS did not affect journey-to-work trips; therefore, no adjustment is necessary.

^bDoes not include time spent waiting for transportation.

^cDoes not include segmented trips.

According to the U.S. Census data, the percentage of workers who car pooled has dropped from 19.7% in 1980 to 13.4% in 1990. The percent of workers using public transit declined from 6.4% to 5.3% during the same time period. The average travel time increased by 0.7 minutes from 1980 to 1990.

Table 11.13
Means of Transportation to Work, 1980 and 1990 Census

Means of transportation	1980 Census		1990 Census	
	Number of workers	Percentage	Number of workers	Percentage
Private vehicle	81,258,496	84.1%	99,592,932	86.5%

^aMetropolitan areas over 1 million population. There were 39 such areas in the 1990 Census.

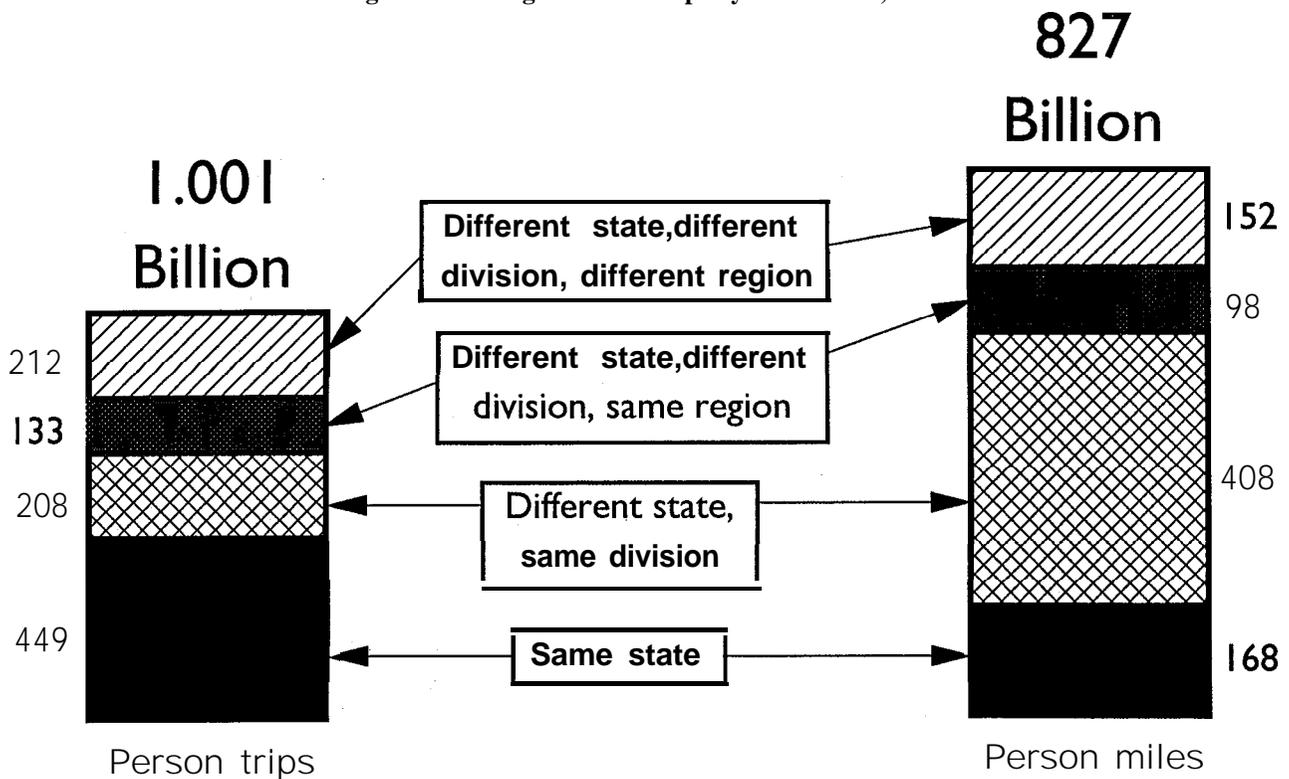

1995 American Travel Survey

The American Travel Survey (ATS) was conducted by the Bureau of Transportation Statistics to obtain information about the long-distance travel of persons living in the United States. Approximately 80,000 randomly selected households were interviewed for the survey, which collected information about all trips of 100 miles or more, one-way, taken by household members in 1995. The ATS data provide detailed information on state-to-state travel, as well as travel to and from metropolitan areas by mode of transportation.

For additional information about the American Travel Survey, contact the Bureau of Transportation Statistics at (202) 366-3282 or visit the following Internet site: <http://www.bts.gov/ats>
