Indiana Statewide Transportation Improvement Program

Table of Contents

Introduction:

- * ISTEA**
- * State Transportation Planning Factors**
- * Transportation Improvement Programs**
- * INSTIP Development**
- * Project Funding Tables**
- * Using INSTIP**
- * INDOT District Boundary Map**
- * List of Metropolitan Planning Organizations (MPOs)**
- * Maps of MPO Planning Boundaries**

Project Sections:

- 1. Section One: Categorical Grouped State Highway Projects**
- 2. Section Two: Statewide Area CMAQ and TEA Detailed Project Listings**
- 3. Section Three: District Area Detailed State and Local Projects**

Chapter 1: Crawfordsville District Area

Chapter 2: Fort Wayne District Area

Chapter 3: Greenfield District Area

Chapter 4: LaPorte District Area

Chapter 5: Seymour District Area

Chapter 6: Vincennes District Area

Chapter 7: Statewide (district 9) Bridge Inspection Program for Local Jurisdiction Bridges

- 4. Section Four: Transit Element-Transit and Other Project Modes**

INTRODUCTION

FISCAL YEAR 1996-1998 INDIANA TRANSPORTATION IMPROVEMENT PROGRAM OF FEDERAL AID TO STATE AND LOCAL HIGHWAY, CONGESTION MITIGATION, ENHANCEMENT AND TRANSIT PROJECTS.

INTRODUCTION

ISTEA:

In 1991, the United States Congress passed the Intermodal Surface Transportation Efficiency Act (ISTEA). Not only did the ISTEA mark the end of the Interstate Highway Program begun in 1956, but it greatly loosened the institutional, financial, and thus the political framework within which decisions on transportation investment had been made for 35 years. Where the federal program historically emphasized transportation investment as an end in itself, the ISTEA provides transportation funds to meet other social goals, thus viewing transportation as a means to achieving some greater aim.

To accommodate this shift from a narrow focus on project selection to a broad perspective on developing a vision for the state's future, the ISTEA places new emphasis on transportation planning, programming and project selection and requires the establishment of a new public participation process to guide the planning process by both Metropolitan Planning Organizations (MPOs) and State Departments of Transportation (DOTs). ISTEA strengthens the previous federal requirement for comprehensive transportation planning by specifying factors to be considered in the development of transportation plans and programs that form the basis for project selection.

This makes transportation planning more comprehensive, reasserts the primacy of policy, reinforces the linkage of planning to policy, and broadens the relationship between transportation planning and other functional planning, such as that for air quality and land use.

In addition to the renewed emphasis on planning by MPOs and the mandate for statewide transportation planning, ISTEA also requires the development of a statewide transportation improvement program (TIP), development of a National Highway System (NHS) and support the establishment and implementation of six management systems.

STATE TRANSPORTATION PLANNING FACTORS

The ISTEA includes the first ever federal mandate for statewide transportation planning. Most of the requirements for the state planning process are similar to those for the metropolitan planning process, with some differences and few additions reflecting the roles of state DOTs.

The ISTEA requires state transportation planning of a very broad type that considers such elements as energy conservation, land use and development policies, environmental protection, and all modes of transportation. It is clear that transportation increasingly is becoming a means to reaching larger objectives. ISTEA requires the state to consider 20 interrelated factors in its long range planning process.

Statewide Planning Factors: Subsection 135(c)

- 1. The results of the management systems required pursuant to subsection(b).**
- 2. Any federal, state, or local energy goals, objectives, programs or requirements.**
- 3. Strategies for incorporating bicycle transportation and pedestrian facilities in projects where appropriate throughout the State.**
- 4. International border crossings and access to ports, airports, intermodal transportation facilities, major freight distribution routes, national parks, recreation and scenic areas, monuments and historic sites, and military installations.**
- 5. The transportation needs of non-metropolitan areas through a process that includes consultation with local elected officials with jurisdiction over transportation.**
- 6. Any metropolitan area plan developed pursuant to section 134.**
- 7. Connectivity between metropolitan areas within the state and with any metropolitan areas in other States.**
- 8. Recreational travel and tourism.**
- 9. Any state plan developed pursuant to the Federal Water Pollution Control Act.**
- 10. Transportation system management and investment strategies designed to make the most efficient use of existing transportation facilities.**
- 11. The overall social, economic, energy, and environmental effects of transportation decisions.**
- 12. Methods to reduce traffic congestion and to prevent traffic congestion from developing in areas where it does not yet occur, including methods to reduce motor vehicle travel, particularly single-occupant motor vehicle travel.**
- 13. Methods to expand and enhance transit services and to increase the use of such services.**

- 14. The effect of transportation decisions on land use and land development, including the need for consistency between transportation decision making and the provisions of all applicable short range and long range land use and development plans.**
- 15. The transportation needs identified through use of the management systems required by section 303 of this title 16. Where appropriate, the use of innovative mechanisms for financing projects, including value capture pricing, tolls and congestion pricing.**
- 17. Preservation of right-of-way for construction of future transportation projects, including identification of unused rights-of-way which may be needed for future transportation corridors, and identification of those corridors for which action is most needed to prevent destruction or loss.**
- 18. Long range needs of the state transportation system.**
- 19. Methods to enhance the efficient movement of commercial motor vehicles.**
- 20. The use of life-cycle costs in the design and engineering of bridges, tunnels or pavement.**

The twenty factors required to be considered in the development of statewide transportation can, the same way as the metropolitan planning factors, be divided into procedural factors and specific factors.

Factors #1, 2, 3, 6, 10, 11, 12, 14, and 15 are all procedural factors; they change the very structure of the planning process. A large number of the factors are procedural simply because the state process is new.

As mentioned before, the state planning process is modeled after the metropolitan planning process conceptually, and the factors that must be considered in developing statewide plans are similar to the metropolitan planning factors reflecting transportation's integration with other needs of society, such as environmental protection and economic growth and competitiveness. There are, however, some planning factors that are different and include both additional planning elements and scope of state responsibility.

Among the requirements that appear only in the list for states are the need to address the long range need of the state transportation system and the consideration of innovation financing for projects.

TRANSPORTATION IMPROVEMENT PROGRAMS (TIPs)

TIP:

A TIP is a programming document developed by Metropolitan Planning Organizations (MPOs) and state departments of transportation that presents a prioritized list of all surface transportation projects for which federal funds are sought. If not included in a TIP, a project will not receive this assistance. In addition, if a proposed highway project will increase functional capacity and lies within the boundaries of an area that has been declared by the United States Environmental Protection Agency (EPA) to be in non-attainment for transportation related pollutants, it must also be included in a TIP as well-regardless of the funds used.

Most importantly, TIPs describe those projects that a public agency can reasonably expect to be implemented within a given time period with the funds available. Although additional projects may be underdevelopment, only those for which funds are anticipated can be shown in a TIP. Therefore, TIPs can be tools to forecast what is likely to be undertaken within existing fiscal limits.

INSTIP:

This document is the Indiana Department of Transportation's transportation improvement program. It is titled "Indiana Statewide Transportation Improvement Program", or INSTIP for short.

The INSTIP is multi-modal, accounting for transit projects as well as highway projects. It includes locally initiated federal aid local jurisdiction projects in addition to INDOT projects on state and federal routes. It is amendable. Projects can be added or updated as needed within the process established by federal, state and local guidelines.

Finally, rather than merely meeting a federal requirement, the INSTIP provides transportation professionals, elected officials, and the public with a document that lists what transportation improvements are programmed against available revenues over the next three years. This makes the INSTIP a means to forecast what projects are most likely to go forward under the existing revenue picture. By comparing a fiscally constrained INSTIP program against existing and future needs, estimates of how much additional revenue is required can be determined. It also helps to illustrate the complex process needed to insure that the best investments are made to the transportation infrastructure of Indiana.

INSTIP DEVELOPMENT

The FY 1996-1998 INSTIP was developed by INDOT in cooperation with INDOT district offices, Metropolitan Planning Organizations (MPOs) and the public. INDOT has many projects under development; however, the amount of federal and state resources is limited. This means that INDOT must determine which projects constitute the best investment over time. To do this, input is gathered from a variety of sources including INDOT's district and central offices, MPOs, local officials and the public.

Public Meetings:

INDOT conducted 12 public meetings to present the draft non-fiscally constrained INSTIP. An afternoon and evening session was held in each of INDOT's six districts at diverse locations. These meetings were as follows:

August 16, 1995-Fort Wayne District
August 17, 1995-LaPorte District
August 22, 1995-Vincennes District
August 23, 1995-Seymour District
August 29, 1995-Crawfordsville District
August 31, 1995-Greenfield District

A report documenting these meetings is available from INDOT's:

Division of Public Affairs
100 N. Senate Ave. Room N755
Indianapolis, IN 46204.
Phone (317) 232-5457

Project Programming

Project proposals are reviewed and analyzed. If approved, the project is programmed into INDOT's production schedule and project development begins. To insure that there are always enough projects available for which to secure federal funds, more projects are placed under development that can be paid for with existing revenue. This practice is called over-programming and helps insure that apportionments of federal funds to Indiana do not lapse. This could happen because delays occur during the projects development for a number of reasons, especially if property must be purchased for the project. Keeping a reservoir of projects under development helps offset the risk of lapsed funds.

State and MPO TIPs cannot reflect this over programming. The value of projects shown cannot exceed forecasted revenues. Therefore, the INSTIP is a fiscally constrained reflection of projects under development. This means that projects shown in the INSTIP may appear in years latter than programmed, or may not appear at all.

Fiscal Constraint

The method used to fiscally constrain the INSTIP was as follows. A list of all projects under development and for which federal aid is sought was prepared for federal fiscal years 1996, 1997, and 1998. The projects in each year were then sorted in order of the date at which they are estimated to be ready to let for construction. This date is also known as the "ready for letting" date or RFL.

The list of projects for fiscal year 1996 was then compared to estimated budget levels as set for construction for that year. After starting with the earliest project, a running subtotal was used to identify the first project in the list that pushed the total over the budget.

This project, and all those after in FY 1996, were then put at the top of the list of the next fiscal year (FY 1997). The process was then repeated for FY 1997 and then FY 1998.

As a result of this process some projects scheduled for FY 96 will be shown in FY 97 with some of FY 97 shown in FY 98 and many FY 1998 projects were moved out of the three year time span of the INSTIP. These projects are still shown, but without federal funding. However, the INSTIP can be changed throughout the year to reflect shifts in agency priorities and/or changes in project development. This means that a project can be amended into the INSTIP if room for it is provided by deleting or moving another project or projects of equal or greater value. Also, funds for a project can be obligated and the project let in a given fiscal year even if it appears in the INSTIP in a later year. This action, however, would draw down available balances for the current year.

Once it was determined which INSTIP program year the projects needed to be shown, the method of presenting them was determined. In order to make the document more flexible and to reduce the need for amendments, projects were displayed in one of two ways. The *first* was to group certain types of projects into categories and then show the program for these project types by category instead of by project. The *second* was to show the remaining projects as individual budget line items. In other words, construction costs in the first method are shown by category or subcategory; construction costs in the second method are shown by each individual specific project.

Also shown as grouped annual categories are costs for preliminary engineering (PE) and right-of-way acquisition (ROW). These costs establish the federal aid budget for PE and ROW in each of the three fiscal years of the INSTIP.

PROJECT FUNDING TABLES

These tables summarize the levels and distribution of funds from the Federal Highway Administration for highway and highway related projects. Funds from Federal Transit Administration (FTA) are present in Section Three of the INSTIP which presents project funding and activity for the other important modes of transportation in Indiana.

Funds from the FHWA are not grants. They provide a program of reimbursement up to only the set level of federal participation. In most cases this is 80% of costs, with either the state or local public agency providing the matching 20% from their own revenue sources.

A discussion of federal aid programs from the FTA and INDOT to local communities is presented in Section Three of the INSTIP.

Table One shows the annual federal aid budget from the Federal Highway Administration (FHWA) as administered by INDOT to support state projects on Indiana and United States routes, and to support those initiated by rural local public agencies such as counties, cities and towns for improvements to local roads and streets. There is also a line item listing federal funds provided through INDOT to Metropolitan Planning Organizations (MPOs). For further details about MPO budgets and project programs in this regard, the reader is advised to contact the appropriate MPO, and to refer to Table Two of the INSTIP. A list of MPOs is included after the funding tables.

Table One has four columns. The first, "Funding Type" lists the various categories of programs to which federal funds are applied. The second, "State Share" lists the amounts in each category that are reserved for state jurisdiction projects. The third, "Local Share" lists the amounts in each category that is set aside for local jurisdiction projects. The fourth, "Total" represents the total combined amount in each category.

The total at the bottom shows the total federal aid program and how it is split between state and local shares. For fiscal year 1996 the total FHWA federal aid program is \$387,262,456.00 with \$296,343,092.00 going to the state and \$90,919,364.00 set aside for rural and urbanized area projects. These are actual figures. For fiscal years 1997 and 1998 it is estimated that the 1996 amounts will apply.

Table Two shows the distribution for federal aid STP funds for projects to the 12 Metropolitan Planning Organizations (MPOs) in Indiana. The MPOs then work with local elected officials, transportation experts, and the public to determine the best use of these federal funds to support local jurisdiction projects.

Table Three is titled "INSTIP Project Funding ('000) 1996-1998 Federal Aid". This table accomplishes two things. First it lists in the left hand column the various project program categories. Then the estimated federal aid budget for construction for each fiscal year is shown

(in thousands of dollars) in the columns to the right. All projects shown are state projects plus any local CMAQ and state or local TEA projects. Also shown are additional funding for two demonstration projects on SR 67 and US 24, and a public lands highway project on a county road through the Hoosier National Forest. These projects represent \$26,305,000.00 in additional funding above the usual apportionment to Indiana.

Projects that have been grouped together into categories begin with "Bridge Projects" at the top of the list and continue down the list through "Safety Projects". The type of work included in each category is shown in smaller type under the category title. A listing of projects that have been placed under these categories are identified in the section titled "Categorical Projects". Individual project costs are not identified for these projects.

Projects that are shown individually (not grouped under a category budget) begin with "Added Travel Lanes" and continue down the list through "Signals/Signs/Lighting" jobs. A total is given in each fiscal year for the federal aid construction budget. These projects are detailed in the "Detailed Projects Section" which is divided in to six chapters, one for each district. Costs for construction is shown for each project listed in these chapters.

Finally, table three shows the annual federal aid budget for "Preliminary Engineering" (PE) and "Right of Way Acquisition" (ROW). Any federal aid for these activities for a state project is covered under these general budget categories and is not shown for individual projects. A grand total federal aid budget is then shown for each fiscal year.

Table Four shows the annual federal aid budget as administered by INDOT to support projects initiated by rural local public agencies such as counties, cities and towns. These funds are in addition to those federal funds provided through INDOT to Metropolitan Planning Organizations (MPOs). For details about MPO budgets and project programs in this regard, the reader is advised to contact the appropriate MPO. A list of MPOs follows the funding tables.

Table four has four columns. The first lists the various program fund codes for both rural and urbanized area local projects. The second shows the amount of these funds programmed in the INSTIP for FY 96, 97, and 98 for preliminary engineering (PE). The third column does the same for right of way acquisition (RW), and fourth column is for construction (CN) funding. At the bottom of the last page of this table the totals by work phase are shown for each fiscal year with a grand total of federal aid to local projects shown next. As seen in the table, the total federal aid for all work phases shown in the INSTIP for local jurisdiction projects is:

FY 1996 \$90,067,000.00
FY 1997 \$89,977,000.00
FY 1998 \$89,876,000.00

INSTIP STRUCTURE AND USAGE

Following the introduction, the document is divided as follows:

Section One: A listing of the state jurisdiction projects that are covered under the category budgets shown in Table One. The projects are listed statewide in category order beginning with bridge replacements. Within each category the list is sorted by road number and then by each project's designation (DES) number. These projects are shown for information purposes only. Although the categories represent a budget line item, individual projects do not.

Section Two: This section presents projects funded with Congestion Mitigation and Air Quality (CMAQ) funds, and those funded with Transportation Enhancement Activity (TEA) funds. CMAQ projects are those specifically aimed at reducing traffic congestion and air pollution. TEA projects are those projects that enhance the use of the transportation system but would not be eligible for funding under the guidelines for highway related projects.

Section Three: This includes six chapters. Each chapter represents one of INDOT's district areas. Each district chapter begins with its own maps, a narrative explaining its organization, and a description of each MPO in the district area. The chapter number corresponds to the District number. They are:

- Chapter 1: Crawfordsville District
- Chapter 2: Fort Wayne District
- Chapter 3: Greenfield District
- Chapter 4: LaPorte District
- Chapter 5: Seymour District
- Chapter 6: Vincennes District

Each district chapter is divided into two parts. The *first* contains projects listings for INDOT federal aid projects on roads under state jurisdiction. The *second* contains local public agency (LPA) federal aid projects under local government jurisdiction.

The state projects shown in these district chapters are those for which federal aid construction costs are shown project by project. In each district area listing, the projects are shown in ascending road number order, then by project type, and then in order of the project's designation (DES) number.

The local jurisdiction projects are shown differently. They are listed in alphabetical order by the name of the local public agency. Within the limits of a fiscally constrained INSTIP, this approach enables the reader to determine at a glance all federal aid projects, if any, for a given LPA in fiscal years 1996 through 1998. Project costs are shown for each phase of work for each project.

To locate a specific state project, consult Table One to determine if it is in a grouped project category, such as bridges, or if it is listed individually in the district project sections. Then turn to either the statewide listing for grouped projects or to the appropriate district chapter if the project is one of the types listed individually with construction costs shown. If the district is not known, consult the statewide district area map shown after the funding tables in the introduction.

To locate LPA projects, simply turn to the local project listings in the appropriate district chapter and look for the name of the LPA in question. If the district is not known, consult the statewide district area map shown after the funding tables in the introduction

Section Four: This section presents transit projects and programs funded with monies from the Federal Transit Administration (FTA), the State of Indiana, and local jurisdictions.

<p>For each type of project listing in the INSTIP, instructions for reading the listings is provided on the next page.</p>

GUIDE TO READING PROJECT LISTINGS

SECTION ONE: Categorical Project Headings:

Des#: Designation or ID number of project

Route: Road Name

Project Description: Type of work programmed

CO: Code number, or number, of the county, or counties, in which the project is located

URB Code: Code number of urbanized area, if any, in which project is located

PLAN SUPPORT: Indicates who or what recommended and justified project. For these projects "DIST" stands for INDOT district office.

AGENCY: Unit of government responsible for the project

READY FOR LETTING: Estimated date project is ready to be let for construction

SECTION TWO: CMAQ and TEA projects

Des NO.: Designation or ID number of project

Route: Road Name

AGENCY: Unit of government responsible for project.

DESCRIPTION: Type of work programmed.

COUNTY. CODES: Number or numbers of the county or counties in which project is located.

URBAN. CODE: Code number of urbanized area, if any, in which project is located

PROJECT SUPPORT: Indicates who or what recommended and justified project. For these projects "DIST" stands for INDOT district office, and TIP stands for an MPO's TIP.

PHASE: Lists the three types of development phases (PE, ROW, CN) for which funds may be programmed. Fund types and ready for letting dates are shown for each applicable phase.

FISCAL YEARS: This part has one column for each of the three fiscal years of the INSTIP.

Under the FEDERAL, STATE or LOCAL sub columns, the amount of federal funds, if any, is shown in thousands of dollars along with state and/or local matching funds. No funds will be shown if the phase is outside the three year span of the INSTIP, or if funds were deleted from listing in the INSTIP in order to maintain fiscal constraint. any, are covered under the line item budgets for these phases as shown in Funding Table Three.

SECTION THREE: District Chapters with Detailed Project Listing Headings:

State Highway Projects

Des NO.: Designation or ID number of project

Route: Road Name

AGENCY: Unit of government responsible for project.

DESCRIPTION: Type of work programmed.

CO. CODES: Number or numbers of the county or counties in which project is located.

URB. CODE: Code number of urbanized area, if any, in which project is located

PROJECT SUPPORT: Indicates who or what recommended and justified project. For these projects "DIST" stands for INDOT district office, and TIP stands for an MPO's TIP.

PHASE: Lists the three types of development phases (PE, ROW, CN) for which funds may be

programmed. Fund types and ready for letting dates are shown for each applicable phase. The words “design and ROW” over RFL as the heading of this column should be ignored.

CONSTRUCTION FUNDING ONLY: This section has four columns and deals with the construction phase of the project. Three fiscal years are shown under the FY column. Under the FEDERAL, STATE or LOCAL sub columns, the amount of federal funds, if any, is shown in thousands of dollars along with state and/or local matching funds. No funds will be shown if the construction RFL date is outside the three year span of the INSTIP, or if funds were deleted from listing in the INSTIP in order to maintain fiscal constraint. For projects in this part of Section Three, only dollar amounts for construction are shown. Amounts for PE and ROW, if any, are covered under the line item budgets for these phases as shown in Funding Table Three.

Local Federal Aid Projects

The headings in this part have the same meaning as described above. However, the table differs because federal and local matching funds are shown for each of the three phases if such funds are programmed in any of the three fiscal years of the INSTIP.

TABLE I

FY 96 FEDERAL HIGHWAY (FHWA) APPORTIONMENT TO INDIANA

FUNDING TYPE		STATE SHARE	LOCAL SHARE	TOTAL (\$)
Interstate Maintenance		54,067,760	0	54,067,760

Directory, and Maps

of

Jurisdictional Boundaries

METROPOLITAN PLANNING ORGANIZATIONS (MPOs)

ANDERSON URBANIZED AREA (MCCOG)
Mr. Jerrold Bridges, Executive Director
Madison County Council of Governments
County Government Center
Anderson, IN 46016
(317) 641-9482 FAX: 641-9486
MADISON

BLOOMINGTON URBANIZED AREA (BATS)
Ms Toni McClure, Acting Director
Bloomington Area Transportation Study
(Bloomington City Plan Commission)
Box 100, Showers Center City Hall
Bloomington, IN 47402
(812) 349-3423 FAX: 349-3443
MONROE

EVANSVILLE URBANIZED AREA (EUTS)
Ms Rose Zigenfus, Executive Director
Evansville Urban Transportation Study
316 Civic Center
Evansville, IN 47708
(812) 426-5230 FAX: 426-5399
VANDERBURGH, WARRICK, POSEY

FORT WAYNE URBANIZED AREA (NIRCC)
Mr. Elias G. Samaan, Director
Northeastern Indiana Regional Coordinating Council
City-County Building, Room 630
One Main Street
Fort Wayne, IN 46802
(219) 449-7309 FAX: 449-7682
ALLEN

INDIANAPOLIS URBANIZED AREA (IDOT)
Lori Miser, Acting Administrator
Indianapolis Department of Metropolitan Development
129 E. Market Street, Fifth Floor
Indianapolis, IN 46204
(317) 327-5151 FAX: 327-5103
BOONE, MARION, HAMILTON, HENDRICKS, JOHNSON

KOKOMO URBANIZED AREA (KHCGCC)
Mr. Mark Mills, Transportation Director
Kokomo and Howard County Governmental Coordinating Council
120 E. Mulberry Street - Suite 116
Kokomo, IN 46901
(317) 456-2338 FAX: 456-2339
HOWARD

LAFAYETTE URBANIZED AREA (TCAPC)
Mr. James D. Hawley, Executive Director
Tippecanoe County Area Plan Commission
20 North Third Street
Lafayette, IN 47901

PROJECT
DETAIL
CHAPTER

1

CRAWFORDSVILLE DISTRICT
(District Number One)
Mr. Frank Switzer, Director
Box 667, 110 West South Blvd.
Crawfordsville, IN 47933

Phone: (317) 362-3700

The Crawfordsville District is one of six INDOT districts in Indiana. It is headquartered in Crawfordsville.

COUNTIES: The following counties are located within this district's area. All or most of: Benton, Boone, Clay, Clinton, Fountain, Hendricks, Montgomery, Parke, Putnam, Tippecanoe, Vermillion, Vigo and Warren counties. It also covers portions of: Carroll, Greene, Hamilton, Jasper, Marion, Morgan, Newton, Owen, and White counties.

ROUTES: The Interstate, United States, and Indiana Routes located within this district area are listed below.

Interstates: 65, 70, and 74

United States Routes: 36, 40, 41, 52, 136, 150, 231, and 421.

Indiana Routes: 18, 25, 26, 28, 29, 32, 38, 39, 42, 43, 43A, 46, 47, 55, 59, 63, 71, 75, 126, 134, 142, 144, 157, 159, 163, 225, 234, 236, 240, 243, 246, 263, 267, 334, 340, 341, 342, 352, 443, and 526

METROPOLITAN PLANNING ORGANIZATIONS (MPOs) The MPOs located within this district's area are listed below. For an overview of MPOs the reader is directed to the introductory chapter of this document.

LAFAYETTE URBANIZED AREA: The Tippecanoe County Area Plan Commission (TCAPC), Urban Area Code: 44

Mr. James D. Hawley, Executive Director
Tippecanoe County Area Plan Commission
20 North Third Street
Lafayette, IN 47901

Phone: (317) 423-9242

Fax: (317) 423-1922

The Tippecanoe County Area Plan Commission's prime function is to engage in planning for the community. In addition, it exercises all the traditional long and short range comprehensive planning, zoning, subdivision and zoning appeals functions for its five member governments. These are unincorporated Tippecanoe County, the towns of Battle Ground and Dayton, and the cities of Lafayette and West Lafayette.

The study area of the transportation plan covers the majority of Tippecanoe County. This, the Greater Lafayette Area Transportation and Development Study (GLATDS), involves multi modal relationships with transit planning, railroad relocation, airport planning and goods movements. The Commission's responsibilities cover the full range of local planning in addition to its transportation role.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPO's TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The Lafayette Urbanized Area has a 1990 Census population of 100,103 persons, which is a 9.55% increase over the 1980 Census population figures.

Lafayette is in "attainment" for air quality, which means it has met the air quality requirements set forth by the EPA for acceptable air quality pollution levels.

Lafayette is bypassed by Interstate 65, a major link connecting Indianapolis and Chicago. US 52 and US 231 also bisect the city. In addition, state roads 25, 26, 38, 126, 443, 526, and 43A are present in the urbanized area.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

TERRE HAUTE URBANIZED AREA: The West Central Indiana Economic Development District, Inc., (WCIEDD) Urban Area Code: 48

Mr. Merv Nolot, Executive Director
West Central Indiana Economic
Development District, Inc.
1718 Wabash Avenue
Terre Haute, IN 47802

Phone: (812) 238-1561
Fax: (812) 238-1564

The West Central Indiana Economic Development District was designated as the MPO for the Terre Haute Urbanized area and serves, in addition, a district composed of the six-county area of Clay, Parke, Putnam, Sullivan, Vermillion and Vigo counties.

The WCIEDD conducts a wide range of planning and social service programs in the area. This includes traditional transportation planning functions such as short and long-

range planning, corridor studies, traffic studies, and traffic volume counting.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTEP.

The 1990 Census indicated that the Terre Haute urbanized area had a population of 77,019 persons which is an increase of 3.05% from the 1980 census.

The area is in "attainment" for air quality, which means it has met the air quality requirements set forth by the EPA for acceptable air quality pollution levels.

Interstate Route 70 bypasses Terre Haute to the South. United States Routes include: US 40, US 41, and US 150. State Roads include SR 42, SR 46, and SR 63, and SR 342.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

FORT WAYNE DISTRICT
(District Number 2)

Mr. N. John Passey, Director
5333 Hatfield Road
Fort Wayne, IN 46808
Phone: (219) 484-9541

The Fort Wayne District is one of six INDOT districts in Indiana. It is headquartered in Fort Wayne, Indiana.

COUNTIES: All of most of the following counties are located within this district's area. Adams, Allen, DeKalb, Elkhart, Grant, Huntington, Kosciusko, Lagrange, Miami, Noble, Steuben, Wabash, Wells, and Whitley. It also covers portions of: Blackford, Fulton, Jay, and St. Joseph counties.

ROUTES: The Interstate, United States, and Indiana Routes located within this district's area are listed below.

Interstates: 69, 80, 90 and 469

United States Routes: 6, 20, 24, 27, 30, 31, 33, 35, 131, and 224.

Indiana Roads: 1, 3, 4, 5, 8, 9, 13, 14, 15, 16, 18, 19, 22, 25, 26, 37, 67, 101, 105, 109, 114, 115, 116, 119, 120, 124, 127, 201, 205, 218, 219, 301, 327, 427, 524, 727, and 827

METROPOLITAN PLANNING ORGANIZATIONS (MPOs): The MPOs located within this district area are listed below. For an overview of MPOs the reader is directed to the introductory chapter of this document.

FORT WAYNE URBANIZED AREA: The Northeastern Indiana Regional Coordinating Council, (NIRCC), Urban Area Code: 34

Mr. Elias G. Samaan, Director of Transportation Planning
Northeastern Indiana Regional Coordinating Council
Department of Planning Services
City-County Building Room 630
Fort Wayne, IN 46802

Phone: (219) 449-7309
Fax: (219) 449-7682

The Northeastern Indiana Regional Coordinating Council was formed in 1974, as a regional planning agency in the State of Indiana. The jurisdictional area of NIRCC includes Adams, Allen, DeKalb and Wells Counties. NIRCC functions not only as the regional development agency, but as the inter-governmental Review Agency for the multi-county area. It conducts traffic monitoring and surveillance programs which gather vital

information and report on traffic volumes, Pedestrian flow, accident analysis, travel times, travel delay, and transit demand forecasting.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed state and local transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The Fort Wayne Urbanized Area has a population of 248,424 persons, according to the 1990 Census. This is an increase of 5.05% over the 1980 Census population.

Fort Wayne is in "attainment" for air quality, which means it has achieved the EPA standards for acceptable air quality.

The Fort Wayne area has a major Interstate, I-69, passing through its borders. US 24, US 27, US 30, and US 33 also serve the metropolitan area. In addition, State Routes 1, 3, 14, and 37 also make their way into the metropolitan area. Also, the area is bypassed to the south, east, and north by Interstate 469.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

SOUTH BEND-MISHAWAKA/ELKHART-GOSHEN URBANIZED AREA: Michiana Area Council of Governments (MACOG), Urban Area Codes: 38 (S. Bend) and 43 (Elkhart/Goshen)

Ms Sandra Seanor, Acting Executive Director
Michiana Area Council of Governments
1120 County-City Building
South Bend, IN 46601

Phone: (219) 287-1829
Fax: (219) 287-1840

The Michiana Area Council of Governments (MACOG) acts as the MPO for two urbanized areas. These are the urbanized areas of South Bend, and Elkhart-Goshen. The South Bend Urbanized area extends into the state of Michigan. Therefore, the MPO coordinates with Southwestern Michigan Commission (SMC). MACOG is responsible for the Indiana portion of the South Bend and Elkhart-Goshen Urbanized Areas while the SMC provides technical and planning assistance to the Michigan portion of the South Bend Urbanized Area.

MACOG's area of representation includes St. Joseph County, Marshall County and Elkhart County in Indiana. This includes the cities of South Bend, Mishawaka, Elkhart, Goshen and Plymouth. In Michigan this also includes the city of Niles in Berrien County.

The scope of this MPO is to maintain and enhance the intermodal transportation planning process. It provides technical and planning support for highway related projects, as well as mass transit programs. MACOG currently operates three transit services in the cities of Elkhart, Goshen and Plymouth, Indiana.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPO's TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

This Urbanized Area has a 1990 Census population of 237,932 persons, which is a 5.13% increase over the 1980 Census population figures.

The urbanized area was a marginal ozone nonattainment area. However, in November of 1994 the area received its redesignation as a maintenance area for air quality.

The urbanized area is served by Interstate 80/90-The Indiana Toll Road, and United States Routes US 20, US 31, and US 33. In addition, State Routes 2, 4, 15, 19, 23, 119, 120, 219, and 331 also serve the metropolitan area.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

GREENFIELD DISTRICT
(INDOT District 3)
Mr. Bradley Davis, Director
P.O. Box 667
Greenfield, Indiana 46140-0667

Phone: (317) 462-7751

The Greenfield District is one of six INDOT districts in Indiana. It is headquartered in Greenfield, Indiana.

COUNTIES: The following counties are located within this district's area. All or most of: Delaware, Fayette, Hamilton, Hancock, Henry, Howard, Jay, Madison, Marion, Randolph, Rush, Shelby, Tipton, Union, and Wayne counties. It also covers portions of: Boone, Blackford, Carroll, Cass Hendricks, Franklin, Grant, Miami, and Morgan counties.

ROUTES: The Interstate, United States, and Indiana Routes located within this district's area are listed below.

Interstates: 65, 69, 70, 74, and 465

United States Routes: 27, 31, 35, 36, 40, 52, 136, and 421

Indiana Routes: 1, 3, 9, 13, 19, 22, 26, 28, 32, 37, 38, 44, 67, 101, 103, 109, 121, 128, 135, 140, 167, 213, 227, 232, 234, 236, 238, 244, 332, and 431

The Metropolitan Planning Organizations (MPOs) located within this district's area are listed below. For an overview of MPOs, the reader is directed to the introductory chapter of this document.

ANDERSON URBANIZED AREA: The Madison County Council of Governments (MCCOG), Urban Area Code: 40

Mr. Jerrold Bridges, Executive Director
Madison County Council of Governments
County Government Center
Anderson, IN 46016

Phone: (317) 641-9482
Fax: (317) 641-9486

The Madison County Council of Governments is a regional planning agency organized in May of 1969 under the Indiana Interlocal Cooperation Act. The organization is governed by an eleven member policy committee representing all of Madison County as well as the individual cities of Anderson, Elwood, and Alexandria. Representation on the committee and annual dues contributions are roughly proportional to population. Local dues are used to provide the necessary local contribution needed for the use of various state and federal programs in Madison County.

In addition to being the Metropolitan Planning Organization (MPO) for transportation, the MCCOG is also active in assisting member governments in economic development, land management, general planning, mapping, grant and ordinance writing, and the administration of a rural Section 18 transit system.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPO's TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTEP.

The Anderson Urbanized Area, according to the 1990 Census, has a population of 74,037 persons. That is a 5.78% decrease from the 1980 Census.

Anderson is "attainment" for air quality, which means it has met the standards set by the EPA for acceptable air quality.

State roads 32 and 9 intersect in Anderson, and Interstate 69 passes just to the south of the city. State Roads 67, 109, 232 and 236, also serve the metropolitan area.

For a detailed look at this MPO's planned activities for Fiscal Year 1993, please contact them either by telephone or in writing.

INDIANAPOLIS URBANIZED AREA: Indianapolis Department of Metropolitan Development (DMD), Urban Area Code: 30

Mrs. Lori Miser, Administrator
Indianapolis Department of Metropolitan Development
129 E. Market Street, Fifth Floor
Indianapolis, IN 46204

Phone: (317) 327-5151
Fax: (317) 327-5103

The Indianapolis Department of Metropolitan Development acts as the MPO for the Indianapolis Urbanized area which includes Marion County and the urbanized portions of Boone, Hamilton, Hancock, Hendricks, and Johnson counties.

As the MPO, it also serves the cities of Beech Grove, Carmel, Greenwood, Indianapolis, Lawrence, Southport, and Zionsville. It also serves the towns of New Whiteland, Speedway, and Whiteland.

The DMD responds to a nine-member Metropolitan

Development Commission with the advice of the Indianapolis Regional Transportation Council in transportation planning and programming matters.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The 1990 Census indicated that the Indianapolis urbanized area had a population of 914,761 persons which is an increase of 9.36% from the 1980 census.

This urbanized area has been declared as a marginal ozone nonattainment area by the EPA. Therefore, the MPO is faced with those additional challenges resulting from the 1990 Clean Air Act Amendments.

Indianapolis is circled by Interstate 465. Connected to it are Interstate Routes 65, 69, 70 and 74. United States Routes 31, 36, 40, 52, 136, and 421 serve the urbanized area along with State Roads 37, 67, 134, 135, 267, 334, and 431.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

KOKOMO URBANIZED AREA: The Kokomo-Howard County Governmental Coordinating Council (KHCGCC), Urban Area Code: 45

Mr. Mark Mills, Transportation Director
Kokomo and Howard County Governmental coordinating Council
120 E. Mulberry Street, Suite 116
Kokomo, IN 46901

Phone: (317) 456 2335

Fax: (317) 456-2339

The Kokomo-Howard County Governmental Coordinating Council was established January 23, 1981, and designated the Metropolitan Planning Organization (MPO) for the Kokomo Urbanized Area on March 4, 1982. The Council is governed by a Policy Board composed of elected local officials and the plan commission members are from the City of Kokomo and Howard County. The Council's activities are reviewed and coordinated by a Technical Advisory Committee composed of representatives of local and state transportation and planning agencies.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation

projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the State's INSTIP.

According to the 1990 Census, Kokomo has a population of 57,146 persons. This is a decrease of 6.66% from the 1980 Census population figures.

Kokomo has met air quality requirements set forth by the EPA, therefore, the city is in "attainment" for air quality.

Kokomo has (2) United States Routes passing through town, US 31 and US 35. The urbanized area is also intersected by State Road 22 and 26.

For a detailed look at this MPO's planned activities for Fiscal Year 1996 and beyond, please contact them.

MUNCIE URBANIZED AREA: Delaware-Muncie Metropolitan Plan Commission (DMMPC), Urban Area Code: 46

Ms Marta Moody, Executive Director
Delaware-Muncie Metropolitan Plan
Commission
206 Delaware County Building
Muncie, IN 47305

Phone: (317) 747-7740
Fax: (317) 284-1875

The Delaware-Muncie Metropolitan Plan Commission is the duly constituted Metropolitan Planning Organization for the Muncie urbanized area and serves the cities of Muncie and Selma along with the urbanized portions of Delaware County.

The DMMPC is the staff for the Metropolitan Plan Commission serving the area. These services include zoning and subdivision planning; land use planning, permit reviews, flood plain management, cartography and map reproduction, census information and house numbering. The services are coordinated with transportation planning and programming activities. The MPO acts as liaison with the Muncie Indiana Transit System (MITS).

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The Muncie Urbanized Area, according to the 1990 Census, has a population of 88,073 persons. That is a 3.72% decrease from the 1980 Census.

Muncie is in "attainment" for air quality, which means it has met the standards set by the EPA for acceptable air quality.

State Roads 3, 32, 67, and 332 serve the Muncie urbanized area, and Interstate 69 passes just to the west of the city. United States Route 35 also serves the area.

For a detailed look at this MPO's planned activities for Fiscal Year 1996 and beyond, contact them either by telephone or in writing.

LAPORTE DISTRICT
(District Number 4)
Mr. William C. Proud, Director
302 Philadelphia Street, Box 429
LaPorte, IN 46350

Phone: (219) 362-6125

The LaPorte District is one of six INDOT districts in Indiana. It is headquartered in LaPorte, Indiana.

COUNTIES: The following counties are located within this district's area. All or most of: Carroll, Cass, Fulton, Jasper, LaPorte, Lake, Marshall, Newton, Porter, Pulaski, St. Joseph, Starke, and White counties. It also covers portions of: Clinton, Elkhart, Kosciusko, and Miami counties.

ROUTES: The Interstate, United States, and Indiana Routes located within this district's area are listed below.

Interstates: 65, 80, 90 and 94

United States Routes: 6, 12, 20, 24, 30, 31, 33, 35 41, 52, 231, and 421

Indiana Routes: 2, 4, 8, 10, 14, 16, 17, 18, 23, 25, 29, 39, 43, 49, 51, 53, 55, 75, 104, 106, 110, 114, 117, 119, 130, 143, 149, 152, 212, 218, 249, 312, 329, 331, 435, 520, and 912

Metropolitan Planning Organizations (MPOs) The MPOs located within this district's area are listed below. For an overview of MPOs the reader is directed to the introductory chapter of this document.

NORTHWEST INDIANA URBANIZED AREA: The Northwest Indiana Regional Planning Commission (NIRPC), Urban Area Code: 36

Mr. James E. Ranfranz, Executive Director
Northwestern Indiana Regional Planning
Commission
6100 Southport Road
Portage, IN 46368

Phone: (219) 763-6060
Fax: (219) 762-1653

The Northwest Indiana Regional Planning Commission is one of two MPOs serving the Chicago-Northwest Indiana urbanized area. The other is the Chicago Area Transportation Study (CATS).

In 1966, the Lake-Porter County Regional Transportation and Planning Commission was formed to conduct a regional transportation planning process in Lake and Porter Counties.

In 1973, the agency's name was changed to its present title and NIRPC was designated as the MPO for Northwest Indiana. LaPorte County was added as a member in 1979.

NIRPC is responsible for coordinating planning and development in Northwest Indiana. NIRPC performs a variety of functions including short and long-range planning, corridor studies, traffic studies, traffic volume counting, and funds allocation. It also provides a forum for the review, programming and development of specific projects. NIRPC also staffs the Little Calumet River Basin Development commission, the Kankakee River Basin commission and the Marina Development Commission.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPO's TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The 1990 Census indicated that the Northwest Indiana and Chicago Urbanized area had a population of 6,792,087 persons which is an increase of 0.18% from the 1980 census.

This urbanized area has been declared as a severe ozone non-attainment area by the EPA. Therefore, the MPO is faced with those additional challenges resulting from the 1990 Clean Air Act Amendments.

Numerous major highway routes serve the urbanized area. In Indiana alone these are Interstate Routes 65, 80, 90, and 94. The concurrent routing of I-80 and I-94 through the area is also referred to as the Borman Expressway. United States Routes present are US 6, US 12, US 20, US 30, US 41 and US 231. State roadways include State Roads 49, 51, 53, 55, 130, 149, 152, 249, 312, and 912. Numerous transit facilities operate in the area, including the Chicago South Shore and South Bend Railroad.

For a detailed look at this MPO's planned activities for Fiscal Year 1996 and beyond contact them either by telephone or in writing.

SOUTH BEND-MISHAWAKA/ELKHART-GOSHEN URBANIZED AREA: Michiana Area Council of Governments (MACOG), Urban Area Codes: 38 (S. Bend) and 43 (Elkhart/Goshen)

Ms Sandra Seanor, Acting Executive Director
Michiana Area Council of Governments
1120 County-City Building
South Bend, IN 46601

Phone: (219) 287-1829
Fax: (219) 287-1840

The Michiana Area Council of Governments (MACOG) acts as the MPO for two urbanized areas. These are the urbanized areas of South Bend, and Elkhart-Goshen. The South Bend Urbanized area extends into the state of Michigan. Therefore, the MPO coordinates with Southwestern Michigan Commission (SMC). MACOG is responsible for the Indiana portion of the South Bend and Elkhart-Goshen Urbanized Areas while the SMC provides technical and planning assistance to the Michigan portion of the South Bend Urbanized Area.

MACOG's area of representation includes St. Joseph County, Marshall County and Elkhart County in Indiana. This includes the cities of South Bend, Mishawaka, Elkhart, Goshen and Plymouth. In Michigan this also includes the city of Niles in Berrien County.

The scope of this MPO is to maintain and enhance the intermodal transportation planning process. It provides technical and planning support for highway related projects, as well as mass transit programs. MACOG currently operates three transit services in the cities of Elkhart, Goshen and Plymouth, Indiana.

The MPO also produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPO's TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

This Urbanized Area has a 1990 Census population of 237,932 persons, which is a 5.13% increase over the 1980 Census population figures.

The urbanized area was a marginal ozone nonattainment area. However, in November of 1994 the area recieved its redesignation as a maintenance area for air quality.

The urbanized area is served by Interstate 80/90-The Indiana Toll Road, and United States Routes US 20, US 31, and US 33. In addition, State Routes 2, 4, 15, 19, 23, 119, 120, 219, and 331 also serve the metropolitan area.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

SEYMOUR DISTRICT
(District Number 5)

Mr. Joe Hall, Director
Box 550, 813 East Tipton Street
Seymour, IN 47274

Phone: (812) 522-5649

The Seymour District is one of six INDOT districts in Indiana. It is headquartered in Seymour, Indiana.

COUNTIES: All or most of the following counties are located within this district's area. Bartholomew, Brown, Clark, Dearborn, Decatur, Floyd, Franklin, Harrison, Jackson, Jefferson, Jennings, Johnson, Monroe, Morgan, Ohio, Owen, Ripley, Scott, Switzerland, and Washington counties. It also covers portions of Crawford, Greene, Lawrence, Marion and Shelby Counties.

ROUTES: The Interstate, United States, and Indiana Routes located within this district's area are listed below.

Interstates: 64, 65, 74, 265, and 275

United States Routes: 31, 50, 52, 150, 231, and 421.

Indiana Routes: 1, 3, 7, 9, 11, 37, 39, 43, 44, 45, 46, 48, 56, 58, 60, 62, 64, 67, 101, 111, 129, 131, 135, 144, 148, 156, 160, 203, 211, 229, 235, 250, 252, 256, 258, 262, 311, 335, 337, 350, 356, 362, 403, 446, and 462

METROPOLITAN PLANNING ORGANIZATIONS (MPOs). The MPOs located within this district's area are listed below. For an overview of MPOs the reader is directed to the Introductory chapter of this document.

BLOOMINGTON URBANIZED AREA: Bloomington City Plan Commission
(BCPC) Urban Area Code: 41

Ms Toni McClure, Acting Director
Bloomington City Plan Commission
P.O. Box 100, Showers Center City Hall
Bloomington, IN 47402

Phone: (812) 349-3423

Fax: (812) 349-3443

The Bloomington City Plan Commission was designated in March of 1982 as the Metropolitan Planning Organization (MPO) for the Bloomington urbanized area. The MPO is also known as the Bloomington Area Transportation Study (BATS) and is an organization consisting of a three-part Intergovernmental steering committee (Citizens, Technical Advisory, and Policy Committees). The Plan commission is the contracting entity,

and the City Planning Department is the lead staff agency. In addition, the Planning Department maintains close working relationships with other City departments, Monroe County government agencies, and Bloomington Transit.

The MPO produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPO's TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The 1990 Census indicated that the Bloomington Urbanized Area had a population 71,440 persons which is an increase of 12.48% from the 1980 census.

The Bloomington urbanized area has been declared an attainment area by the EPA. However, the maintenance and improvement of air quality standards is an important local planning objective. Therefore, a representative from the State Board of Health's Air Pollution and Control Board participates on the Technical Advisory Committee.

The Bloomington Metropolitan Area is served by State Roads 37, 45, 46, 48, and 446. There are no United States or Interstate routes in the area.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.

LOUISVILLE URBANIZED AREA: The Kentuckiana Regional Planning and Development Agency (KIPDA), Urban Area Code: 32

Mr. Jack Scriber, Executive Director
Kentuckiana Regional Planning and Development Agency
11520 Commonwealth Drive
Louisville, KY 40299

Phone: (502) 266-6084
Fax: (502) 226-5047

The Kentuckiana Regional Planning and Development Agency is the Metropolitan Planning Organization (MPO) for the bi-state Louisville Urbanized Area which encompasses Clark and Floyd Counties in Indiana. KIPDA's governing board consists of county officials from nine counties as well as officials from member cities and towns, including New Albany, Jeffersonville, and Clarksville.

The MPO produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation

projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

The Louisville Urbanized Area had a 1990 Census population count of 754,956, which is a 0.79% decrease from the 1980 Census figures.

The Louisville area has been designated by the EPA as a moderate ozone area. Therefore, the MPO is faced with those additional challenges resulting from the 1990 Clean Air Act Amendments.

Louisville is a significant intersecting point for many major highways, including I-64, I-65, I-71 and I-264 and I-265. The urbanized area also serves as an intersection for many State and US Routes which connect Southern Indiana and Kentucky. In Indiana these are State Routes 11, 60, 62, 111, 131, 311, and United States Routes 31, 150 and Interstates 65 & 265.

For a detailed look at this MPO's planned activities for Fiscal Year 1993, please contact them either by telephone or in writing.

DETAIL
CHAPTER

6

VINCENNES DISTRICT
(District Number 6)

Mr. Gregory Curtis, Director
Box 376, 2526 North 6th Street
Vincennes, IN 47591

Phone: (812) 882-8330
Fax: (812) 882-2752

The Vincennes District is one of six INDOT districts in Indiana. It is headquartered in Vincennes, Indiana.

COUNTIES: The following counties are located within this district's area. All or most of: Crawford, Daviess, Dubois, Gibson, Greene, Knox, Lawrence, Martin, Orange, Perry, Pike, Posey, Spencer, Sullivan, Vanderburgh, and Warrick counties. It also covers portions Clay, Owen, Vigo, and Washington counties.

ROUTES: The Interstate, United States, and Indiana Routes located within this district's area are listed below.

Interstates: 64 and 164

United States Routes: 41, 50, 150, and 231.

Indiana Routes: 37, 43, 45, 48, 54, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 145, 154, 157, 158, 159, 161, 162, 164, 165, 166, 168, 237, 241, 245, 257, 261, 264, 269, 337, 356, 357, 358, 364, 441, 445, 450, 458, 545, 550, 558, 645, 650, and 662.

METROPOLITAN PLANNING ORGANIZATIONS (MPOs). The MPO located within this district's area is described below. For an overview of MPOs the reader is directed to the Introductory chapter of this document.

EVANSVILLE URBANIZED AREA: The Evansville Urban Transportation Study (EUTS), Urban Area Code: 42

Ms. Rose Zigenfus, Executive Director
Evansville Urban Transportation Study
316 Civic Center
Evansville, IN 47708

Phone: (812) 426-5230
Fax: (812) 425-5399

The Evansville Urban Transportation Study was designated as the Metropolitan Planning Organization (MPO) for the Evansville Urbanized Area on July 31, 1986. The Evansville Urbanized Area includes all of Vanderburgh County except Union Township, a portion of Warrick County, the Town of Newburgh, the

City of Henderson, Kentucky and a portion of Henderson County, Kentucky. EUTS Policy Committee membership consists of elected officials representing member jurisdictions of the EUTS Study Area.

The MPO produces an annual Transportation Improvement Program (TIP). This document reflects programmed transportation projects for at least three consecutive years. All surface transportation projects in the urbanized area that request federal assistance must be included in an MPOs TIP. This includes INDOT projects. Therefore, the TIP provides vital programming support for the INSTIP.

According to the 1990 Census, the Evansville Urbanized Area had a population of 183,087 persons, which is an increase of 1.66% from the 1980 Census.

Evansville is no longer designated by the EPA as a marginal ozone non-attainment area. Improvements to air quality has resulted in the area being designated as a maintenance area.

Evansville has one US Route which intersects its borders, US 41. Interstate 64 is several miles north of Evansville, and Interstate 164 a spur route which connects the area to I-64 passes just east and south of the city. In addition, State Roads 57, 62, 65, 66, 261, and 662 are present in the urbanized area.

For a detailed look at this MPO's planned activities for Fiscal Year 1996, please contact them either by telephone or in writing.
