

ACKNOWLEDGMENTS

The financial support for this study was provided by the Kansas Department of Transportation (KDOT) under the Kansas Transportation and New Developments (K-TRAN) program. Mr. Andrew J. Gisi, P.E. was the project monitor for this research project. The author wishes to acknowledge his professional advice and comments throughout this study. Assistance of Ms. Lea Ann Caffrey of KDOT in data collection is gratefully acknowledged. The help of the Department of Statistics at Kansas State University (KSU) with statistical analyses and tests and Ms. Jennifer Jacka of KSU in manuscript preparation is appreciated.
