

APPENDIX D ASC TRANSACTION LOG

This appendix lists the files on the tapes furnished by the ASC operator. There were multiple files each week, and each file covered varying time periods. As a part of verifying that the files were usable, records were made of the beginning and ending times for each file. Those times are recorded in the log along with the date the file was added to the master tape and the size of the files.

An explanation of the columns in the ASC Transaction Log Table follows

Definition of Contents, ASC Transaction Log

Column	Definition of Contents
No.	A running count of the number of files. Observe that 17 files were collected in Shakedown and 163 files were collected during the formal data collection period.
File Name	A file name automatically assigned by the ASC based on the year, month, date, and time of the last record in the file
From Date	The date of the first record in the file
From Time	The time of the first record in the file
To Date	The date of the last record in the file
To Time	The time of the last record in the file
Date Received	The date the file was received from the ASC operator
Add to Master	The date the file was added to the master tape
Comments	Size of the file plus, during shakedown, additional comments concerning file contents.

As the files were read, it became apparent that there were gaps in the data. The missing data was reported to Scientific Atlanta during the test, but fill-in data was not supplied.

ASC Transaction Log

ASC Transaction Log Tracking Form		Period Covered				Add to		Comments	
No.	File Name	Date	Time	Date	Time	Date Received	Master
