The DMPTool is an online wizard that:

- Helps users create ready-to-use DMPs for specific funding agencies
- Provides step-by-step instructions and guidance for how to manage data
- Connects researchers with information and resources at their institution/organization

[Overview of tool features](#)

[How do I create a DMP?](#)

[Sharing your DMP publicly](#)

[How do I get help from someone at my institution?](#)

Who can use the tool?

DMPTool is free for anyone to create data management plans.

- If you are a researcher from one of the [partner institutions](#), you can log in using your institutional credentials. By being affiliated with your institution, you may be presented with institution-specific guidance (displayed as section-specific instructions and/or resource web links) to help you complete your plan.
- If your institution is not a partner, you can create your own account by selecting “Not in List” as your institution upon login.

How do I log in?

Click on **Log In** at the top-right of the home page. You can also click the green “Get Started” button.

Quick Overview of Terms

A "template" is a set of questions (i.e., requirements) that form the basis of a data management plan. Customizing a funder template means you are adding institution-specific resources (e.g., suggested answers, guidance, or links to institutional resources) that will appear in the DMPTool wizard for your institution's users. New templates can also be created for institutions by institutional administrators. See the [Glossary](#) for more descriptions of terms used in this wiki.

Becoming a DMPTool Partner

DMPTool Partners are institutions, profit and nonprofit entities, individuals, or other groups that are committed to the DMPTool's utility and success as an effective and efficient way to create data management plans. Our goal in establishing and recognizing our partner institutions is to build a committed community of users that sustain and support the evolution of the DMPTool. Institutions can become partners by agreeing to the Partner Principles below (no signature required), plus completing at least one of the following:

- Establish institutional authentication with the DMPTool (Shibboleth, LDAP, etc.)
- Customize the tool with resources, help text, suggested answers, or other information.
- Contribute to the maintenance and enhancement of the DMPTool codebase.

- Admin listserv

Template Outline

-  **Data description**
-  Data format and metadata standards
-  Policies for access and sharing
-  Policies for re-use, redistribution, derivatives
-  Plans for archiving and preservation

Instructions

Links

Describe the data that will be gathered in the course of the research project, including whether the data should be preserved for long-term access.

Guidance

box size: [small](#) | [medium](#) | [full](#)

Provide a description of the data that you will be gathering in the course of your project. You should address the nature, scope, and scale of the data that will be collected. Describe the characteristics of the data, their relationship to other data, and provide sufficient detail so that reviewers will understand any disclosure risks that may apply. Discuss value of the data over the long-term.

Category: Project

Description:

This is a three-year National Leadership Grant for Libraries Demonstration Project to facilitate a multi-university study of faculty data management plans (DMPs). The primary outputs of this project will be an analytic rubric to standardize the review of data management plans as a means to inform targeted expansion or development of research data services at academic libraries; and a study utilizing the rubric that presents the results of data management plan analyses at five universities. This project was made possible in part by the Institute of Museum and Library Services grant number LG-07-13-0328.
