The U.S. Trade and Development Agency

The U.S. Trade and Development Agency assists in the creation of jobs for Americans by helping U.S. companies pursue overseas business opportunities. Through the funding of feasibility studies, orientation visits, training grants, conferences, and various forms of technical assistance, TDA enables American businesses to become involved in the planning stages of infrastructure and industrial projects in middle-income and developing countries. By doing this, the agency provides American firms with market entry, exposure, and information, helping them establish a position in markets that are otherwise difficult to penetrate.

1 PORT OF DURRES – MARKET FORECAST

1.1 Introduction

This chapter describes the development of the long- range trade forecast for Transport Corridor 8 and for the Port of Durres, Albania.

The market forecasts are focused on three trade flows: (1) import and export trade of Albania, (2) import and export trade of Bulgaria and Macedonia that can be routed through the Port of Durres and (3) trade flows between countries east and west of the Port of Durres, which could move over Corridor 8 and utilize the Port of Durres.

WBK prepared the projected market shares for Corridor 8 and the Port of Durres. The Port market shares of potential TEU[1] cargo flows are estimates based on origin/destination analysis, container line vessel deployments and the use of published TEU statistics for ports. Potential TEU cargo flows are those container (or trailer) volumes that can be captured by Durres and/or Corridor 8 assuming competitive port and rail rates, dependable service and aggressive marketing.

Corridor 8 initial "Landbridge"[2] container volume is first forecasted for the year 2010. It is assumed that new railroad right-of-way construction connecting the gaps on Corridor 8, will be completed by that year permitting the use of unit train operations between Durres and the Black Sea ports of Burgas and Varna. Unit train operations will also stimulate new Minibridge[3] and Microbridge[4] container markets in each of the cooperating Landbridge partner countries.

The East-West Balkans Landbridge concept is shown on the map (Figure 1-1) that follows.

---

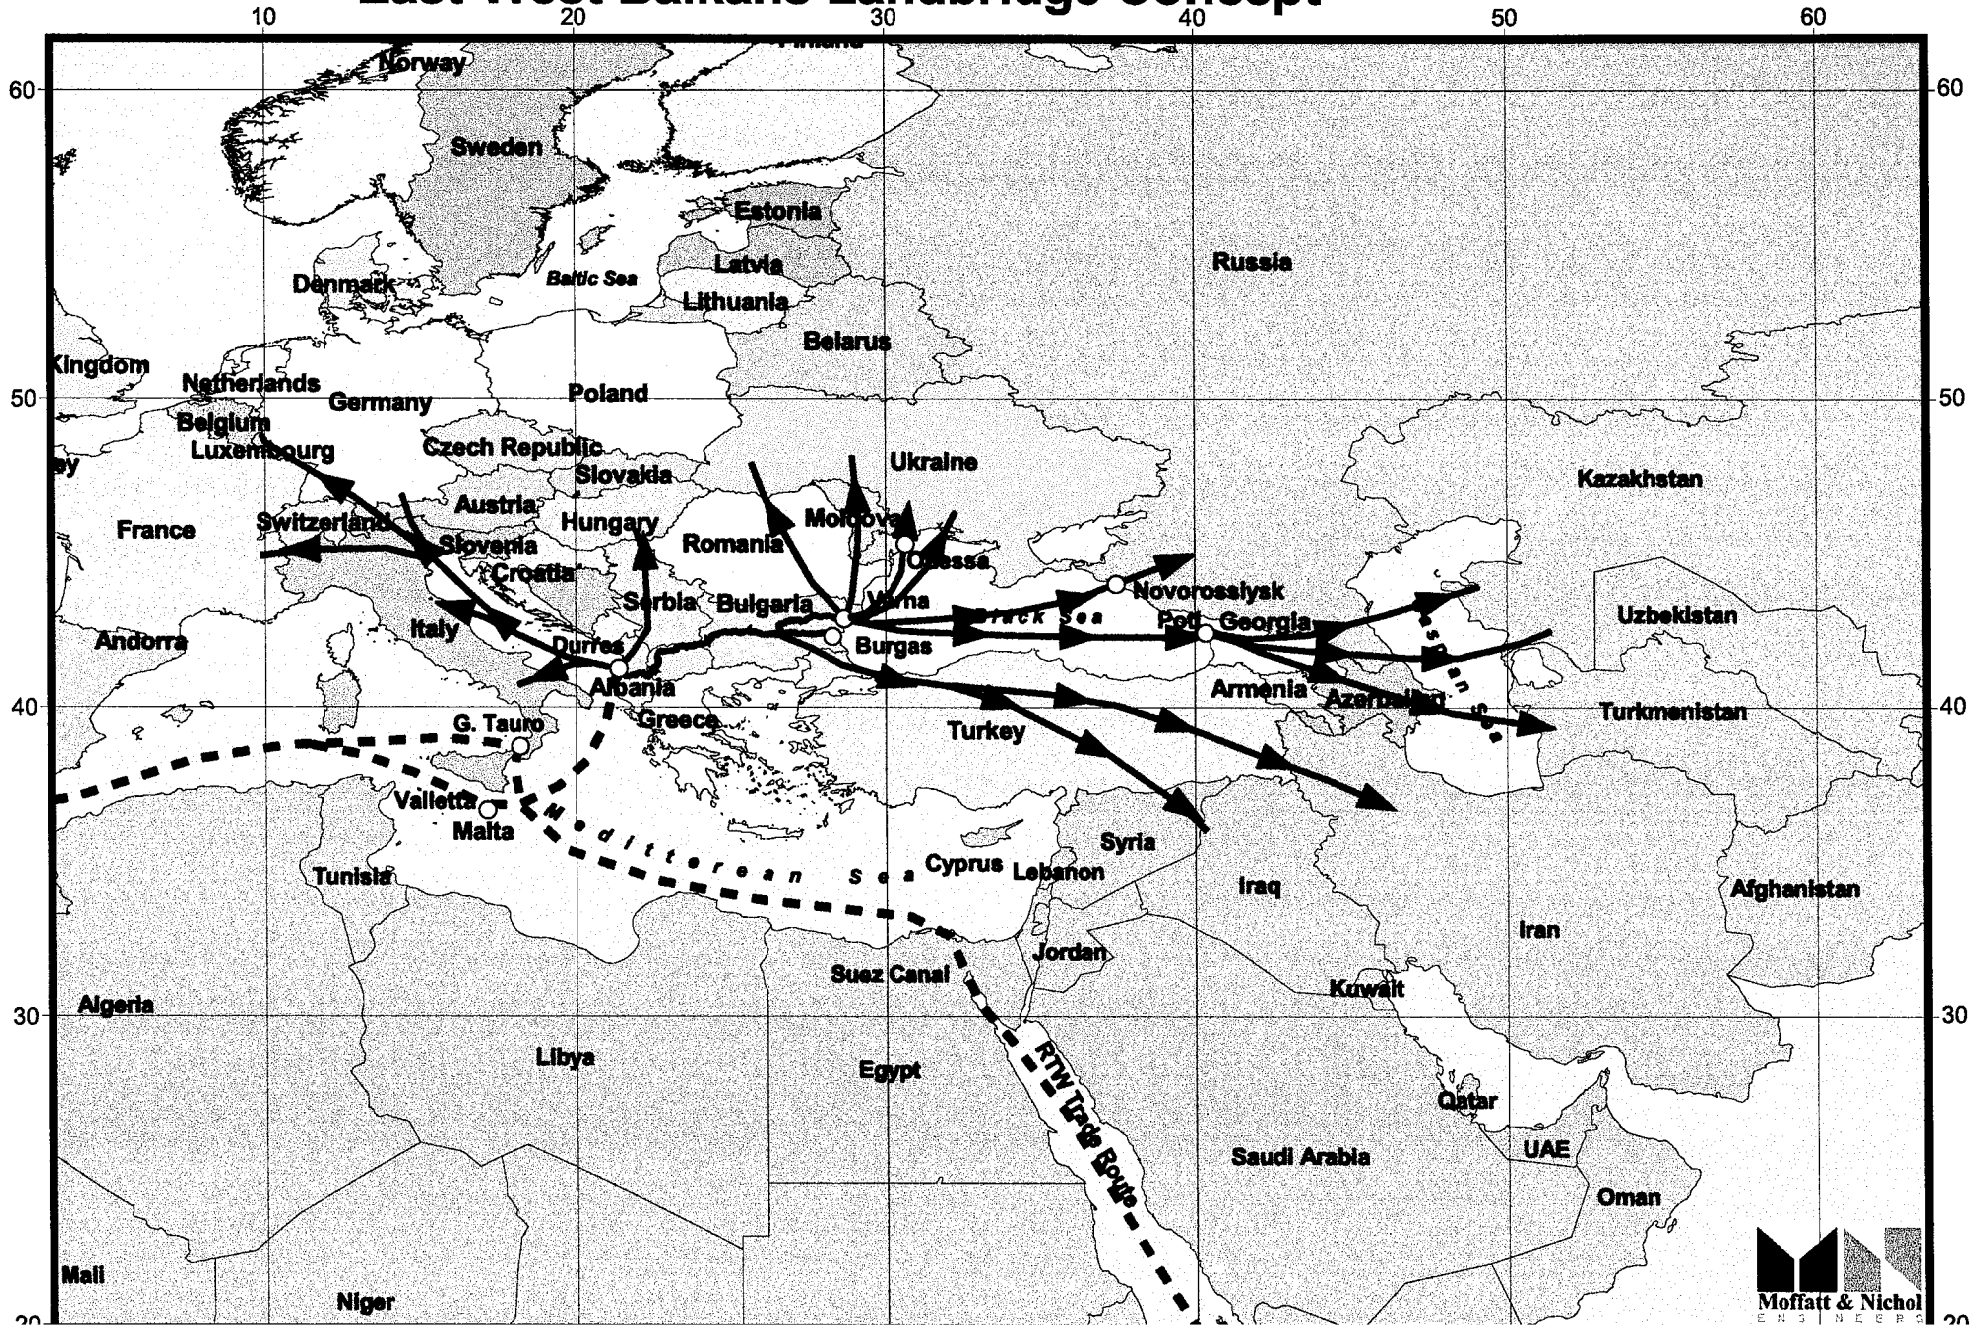
[1] Twenty-Foot Equivalent Unit (TEU) is a maritime abstraction; for example, a twenty-foot container with a cubic capacity of 28.3 cubic meters equals one TEU. A forty-foot container equals twoTEU's. High cube highway trailers with 85 interior cubic meters equal three TEU's. In weight terms, ten tons is generally considered as oneTEU.

[2] An intermodal connection between two ocean carriers separated by a landmass, linked by a land carrier and utilizing a single bill of lading for a seamless transaction.

[3] A joint, single bill of lading, water-rail (or rail-water) container movement between a trade partner country and Durres, Burgas or Varna -- via Durres, Burgas or Varna.

[4] A joint, single bill of lading, water-rail (or rail-water) container movement between a trade partner country and an inland intermodal terminal in Macedonia via Durres, Burgas or Varna.

Figure 1-1: Port of Durres Multimodal Container Facility Study
East-West Balkans Landbridge Concept



1.2 Market Forecast Development

The trade forecasts were based on base historical trade data obtained from the United Nations Statistical Division and trade forecasts obtained from WEFA, Inc. The UN data provided 4 digit trade data between Albania and Bulgaria and all trade partners, between all trade reporting countries and Macedonia and between 36 countries east and west of Corridor 8, that might use Corridor 8 and the Port of Durres. Most of the 4 digit trade data was reported in tons and the remainder was converted from value to tons. All tonnage data was further adjusted to the containerizable percentage which was converted to TEUs.

The forecasts are based on the long-range forecasts prepared by WEFA, Inc. WEFA, Inc. produces the WEFA World Trade Service which projects global trade aggregated to bilateral trade in 77 commodity groups between 60 countries and regions. WEFA forecasts were available through the year 2018. The 4 digit country pair base trade data was linked to the WEFA forecasts by commodity group and origin/destination to project all 4 digit trade flows between all country pairs in the base cargo database. In addition, WEFA data was checked and verified using similar data supplied by MDS-Transmodal of the U.K.

The resulting forecasts projected the total tons of trade by 4 digit commodity between all country pairs. Next the containerizable portion of the total tons, which are containerizable or potentially containerized, was computed based on the containerizable portion of each WEFA commodity group. The container tons were translated into TEUs based on the average tons per TEU by WEFA commodity group. (The detailed forecasts of total trade and total TEU trade by 4 digit commodity and trade partners are included in underlying Access files.)

The total trade and total TEU trade flows were then combined with potential TEU market shares by country pair, prepared by WBK. For each trade flow, WBK developed the portion of total trade potentially available for movement through the Port of Durres. The resulting forecasts represent the Potential Market Forecast for the Port of Durres. The Potential Market Forecast is summarized in the following section. (The complete Total Market Forecasts, Potential Market Shares and Potential Market Forecasts are included in the accompanying Durres Model Excel file in the Appendix. Selected portions of the model file are included in the following Section.) The Model will be delivered in an electronic format for future use by the Port.

1.3 Potential Market Forecast

The following tables summarize the Potential Market Forecast for the Port of Durres. The forecasts were prepared by trade partner for trade with Albania, Bulgaria, Macedonia and Corridor 8 country pairs. These tables are the result of forecasts of 4 digit commodity by trade partner, converted to TEU movements and adjusted for the share of the total market that is potentially available to the Port of Durres. In the subsequent section, the Potential Market

Forecast is aggregated and projected market shares are applied to compute the market forecast for the Port of Durres.

For each trade the tables below display the TEUs traded with the top 10 trade partners. An all other subtotal and the total TEUs for the trade flow are also shown.

The Potential Market Forecasts were initially forecast through the year 2018 based on the WEFA, Inc. forecasts. In this section, the forecasts were extended to 2025 based on the growth rate for 2018 applied to the years 2019 through 2025.

1.3.1 Albania

The import and export trades of Albania represent the primary market for the Port of Durres.

The following Tables 1.3.1. and 1.3.2. summarize the export and import TEU forecasts for Albania. The top 10 partners are ranked in the table and an other partner subtotal and total for Albania are shown.

1.3.1.1 Albania Exports

Table 1.3.1. summarizes the export TEU forecast for the Potential Market Forecast for Albania exports. As shown in Table 1.3.1, the potential market TEUs exports from Albania are projected to increase from 5,500 TEUs in 2000 to 17,739 by the year 2025.

1.4 Port of Durres Forecast

1.4.1 Potential Market Forecast Summary

Table 1.4.1 summarizes the Potential Market Forecast for the Port of Durres between 2000 and 2025. The forecasts in Table 1.4.1. summarize the forecasts from the previous section.

As shown in Table 1.4.1. the Potential Market for the Port of Durres includes approximately 66,000 Albania TEUs, which are projected to increase to over 150,000 TEUs by the year 2025. The potential TEU trade to and from Bulgaria increases from 121,000 TEUs in 2000 to 403,000

TEUs by 2025. Macedonia Potential Market TEUs increase from 35,000 TEUs in 2000 to 120,000 TEUs in 2025. The Corridor 8 TEUs increase from 753,000 TEUs to almost 2.2 million TEUs by 2025.

Table 1.4.1 Port of Durres – Potential Market Forecast 2000 to 2025 (TEUs)

POTENTIAL MARKET	2000	2005	2010	2015	2020	2025
ALBANIA EXPORTS	5,500	7,175	9,126	11,455	14,133	17,426
ALBANIA IMPORTS	60,735	72,692	85,761	100,729	116,577	134,224
BULGARIA EXPORTS	96,776	134,746	176,174	224,553	277,401	341,842
BULGARIA IMPORTS	24,132	29,139	35,153	42,581	51,162	61,439
MACEDONIA EXPORTS	16,796	22,983	30,313	39,074	49,554	62,679
MACEDONIA IMPORTS	18,187	23,936	30,581	38,554	47,705	58,903

1.4.2 Port of Durres Market Share

The portion of the Potential Market Forecast, which is projected to transit through the Port of Durres, is shown in the following table. As shown in Table 1.4.2, 100% of the Potential Market Forecast for Albania is projected to move through Durres.

Between 2000 and 2010, one percent (1%) of the Potential Market Forecast TEUs imported and exported by Bulgaria and Macedonia per year are projected to move through the Port of Durres. After 2010, the Port of Durres share is projected to increase by 1 market share point per year through the year 2025. By the year 2025, 17 percent of the Bulgaria and Macedonia Potential Market Forecast is projected to move through the Port of Durres.

Only one percent of the Potential Market Forecast was projected because of the difficult marketing conditions that must be overcome by the Port Administration and the Ministry of Transport before larger volumes of trailer and/or container traffic can be confidently forecasted. These issues will be examined in greater detail in the Final Report. The Trade Flow Model,

however, will easily accommodate any changes in conditions that would allow for a more robust forecast.

Finally, the market share for the Corridor 8 Potential Market Forecast is 0% through the year 2010. Railway construction connecting the corridor's rail segments should be completed by 2010, which will enable the Corridor 8 partners to commence efficient unit train operations between the Adriatic and the Black Sea. From 2010 to 2025, the Port of Durres share of the Corridor 8 Potential Market Forecast increases by .25 market share points per year, reaching a level of 4% by 2025. Faster development of the rail corridor would give Durres an earlier capacity to access round-the-world (RTW) and tri-continent shipping lines that transit the Mediterranean calling only at marine terminals that have relay services via feeder vessels for service strings North and South of their basic East-West deployments. Gioia Tauro, Italy and Valletta, Malta are major relay ports on the East-West RTW trade routes, as shown in Figure 1.1

Table 1.4.2 Port of Durres – Projected Market Share: 2000 to 2025 (%)

MARKET SHARE (%)	2000	2005	2010	2015	2020	2025

CORRIDOR8	0	0	0.25	1.5	2.75	4

International container traffic between Bulgaria/Macedonia and the world will continue to use Black Sea and Greek Ports almost exclusively until 2010. Increasing the Durres share of this intermodal traffic depends on infrastructure improvements in Albania and in connecting the railroads of the three Corridor 8 partners. Substantial volumes of Kosovo traffic, however, could be captured by Durres using existing facilities. The ways and means of accomplishing this goal will be discussed in the final report.

1.4.3 Port of Durres – Projected TEUs

Table 1.4.3. summarizes the Projected TEUs for the Port of Durres. As shown in Table 1.4.3. the Port of Durres TEUs are projected to increase from 68,000 in 2000 to 328,000 TEUs by the year 2025, assuming the market share levels defined in the previous section. Almost 50 percent of the forecast TEUs are import and export trade of Albania. Another 25% of the forecast TEUs are imported and exported by Bulgaria and Macedonia and the Corridor 8 TEUs are projected to account for the final 25% of the Port of Durres TEUs.

Table 1.4.3 Port of Durres – Projected TEUs: 2000 to 2025

MARKET SHARE	2000	2005	2010	2015	2020	2025
ALBANIA EXPORTS	5,500	7,175	9,126	11,455	14,133	17,426
ALBANIA IMPORTS	60,735	72,692	85,761	100,729	116,577	134,224

TOTAL	67,793	81,976	103,322	158,584	231,497	328,488

1.4.4 Critical Issues Commentary

For the Port of Durres to achieve the forecasted market share of container traffic noted above, depends greatly on the resolution of the following critical issues:

- Continued growth of tractor-trailer traffic through the Durres Ferry Terminal by implementing an aggressive marketing program.
- Improved in country security for tractor-trailer drivers.
- Expediting of Customs clearing procedures at the country's borders, reducing wasted time by drivers and equipment.
- Rapid rehabilitation of key highways between the Port and its hinterland markets.
- Attention to the development of the system of unaccompanied trailers on ferry vessels and trailer-on-flat car (TOFC) rail operations between the Port and its hinterland markets.

These issues and others will be more fully examined in the Final Report but are noted here for early consideration by the Port Administration and the Ministry of Transport officials.

1.5 Trade Flow Model

The Trade Flow Model is contained in the Excel Spreadsheets presented in the Appendix, which function as a model. Changes to the market forecast for any country pair, changes to the potential market forecast shares and the Port of Durres market shares, will recompute the forecasts for the Port of Durres.

Appendix

The Appendix includes the tables containing the Total Market Forecasts and Potential Market Forecasts. The tables also include the calculations, which produced the Port of Durres forecast.

The calculations included in the Appendix tables are the model functions developed to support the forecast calculations.

APPENDIX "A"

APPENDIX "A"

PORT OF DURRES MARKET FORECAST AND TRADE MODEL

Market Forecast

This Appendix "A" and the associated Excel File contain the Total TEU Forecasts by country pair which are projected to compute the Potential Market Forecast for the Port of Durres. It also contains the Potential Market Shares and the calculations of the Potential Market Forecast. The Summary (Table A-1) includes the Port of Durres market share forecast and the forecast of TEUs for the Port of Durres.

Trade Flow Model

The spreadsheets in this file function as a model. Changes to the market forecast for any country pair, changes to the potential market forecast shares and changes to the Port of Durres market shares and timing will recompute the forecasts for the Port of Durres.

Note: All pages in the workbook can be printed with the print entire workbook command. The pages have been setup to fit on approximately 35 pages. This procedure will print the Appendix tables with the following page numbers.

In the following tables, the tables labeled Total Market Forecast are the total TEUs to and from all trade partners and the tables labeled Potential Market Forecast are the TEUs potentially available for transit through the Port of Durres. As noted, the Potential Market Forecast TEUs are the total TEUs multiplied by the Potential Market Shares in the tables.
