

# Bridge WIM and Enforcement

Aleš ŽNIDARIČ, ZAG Ljubljana

# Effect of weighing with police

# Potential use of B-WIM for enforcement

- features which could prove efficient for enforcement:
  - system is discrete, with sensors and other equipment hidden under the bridge deck
  - long detour makes overloading less attractive
  - unlike pavement WIM systems B-WIM system always weighs the whole vehicle
- **accuracy:**
  - especially if done for different weight levels
  - requires some attention
- portability

**A(5)/D+(20)**
