<b>15. Supplementary Notes</b>			
<b>16. Abstract</b> MDOT has identified the need for a single statewide approach to documentation for emergency rerouting practices. This research effort documents some of the best practices in incident management and emergency rerouting that have been implemented across the country. The research documents components of programs that are applicable and can easily be adopted by the State of Michigan to increase safety and mobility. This guidance includes recommendations for establishing and maintaining effective inter-agency relationships that foster resource sharing and improved traffic management strategies. It also provides recommendations for permanent signing of emergency reroutes.			
<b>17. Key Words</b> Emergency Reroutes, Incident Management, Transportation Operations Centers, Signing, Interagency Coordination,		<b>18. Distribution Statement</b> No restrictions. This document is available to the public through the Michigan Department of Transportation.
